Note: BSC: Basic Science Course, IPCC: Integrated Professional Core Course, PCC: Professional Core Course, INT –Internship, HSMC: Humanity and Social Science & Management Courses, AEC–Ability Enhancement Courses. UHV: Universal Human Value Course, MP: Mini Project

L – Lecture, T – Tutorial, P- Practical/ Drawing, S – Self -Study Component, CIA: Continuous Internal Assessment, SEE: Semester End Examination, TD- Teaching Department, PSB: Paper Setting department.

Integrated Professional Core Course (IPCC): Refers to Professional Theory Core Course Integrated with Practical of the same course. Credit for IPCC can be 04 and its Teaching– Learning hours (L: T: P) can be considered as (3: 0: 2) or (2: 2: 2). The theory part of the IPCC shall be evaluated both by CIA and SEE. The practical part shall be evaluated by only CIA (no SEE). However, questions from the practical part of IPCC shall be included in the SEE question paper.

Mini Project Work:

Mini Project is a hands-on course which will provide a platform to students to enhance their practical knowledge and skills by the development of small systems/applications. The mini-project requires the students to carry out interdisciplinary work either as an individual student or to a group having not more than FOUR students.

- 1. The mini-project work will carry only the CIA component and will not have SEE component.
- 2. The mini project needs to be mandatorily done as Interdisciplinary work.
- 3. The Circuit branches (CSE/ISE/CSE-DS/CSE-CY/AI-DS/AI-ML) need to do the mini-project with non-circuit branches (ME/RA/ECE).
- 4. The circuit branches cannot do the mini-project with another Circuit branch, i.e. CSE with ISE/CSE-DS/CSE-CY/AI-DS/AI-ML.
- 5. The Start-up companies and LLPs may be involved in carrying out the Mini-project work.

6. The evaluation of the mini-project work will be done by two faculty members one faculty member from parent stream and another faculty member from the inter-disciplinary stream

BoS SPECIFIED NPTEL COURSES

(APPLICABLE ONLY TO THE STUDENTS WHO FAIL IN A COURSE MORE THAN FOUR TIMES)

| Course Code | Course Name | Alternative NPTEL Courses* | | | | | | | | |
|-------------|-------------|----------------------------|--|--|--|--|--|--|--|--|
| Α | | | | | | | | | | |
| В | | | | | | | | | | |
| С | | | | | | | | | | |
| * | | | | | | | | | | |

*subjected to change depending on the courses offered by the NPTEL.

Note:

- The student has to provide the evidences for registering to the course, assignment submission, attending the examination and the certificate provided by NPTEL indicating the clearance of the Course by the candidate.
- Only on submitting the valid documents, the student will be awarded with the credits mentioned against the course(s)

Innovation/ Entrepreneurship/ Societal Internship: Students who missed the internship due to the Supplementary Semester have to complete the mandatory 4-week internship during the intervening period of the FIFTH and SIXTH semesters. The students need to satisfy all the requirements of the internship parameters. The evaluation of the Innovation/ Entrepreneurship/ Societal Internship will be done in the SIXTH semesters and the grades will be included in the SIXTH semester Grade card. In case, if the student fails to meet the internship requirements, they will be awarded with 'F' grade and will have to re-register and complete the same whenever offered.

Note: BSC: Basic Science Course, IPCC: Integrated Professional Core Course, PCC: Professional Core Course, INT –Internship, HSMC: Humanity and Social Science & Management Courses, PEC–Professional Elective Course. OEC: Open Elective Course

L – Lecture, T – Tutorial, P- Practical/ Drawing, S – Self -Study Component, CIA: Continuous Internal Assessment, SEE: Semester End Examination, TD- Teaching Department, PSB: Paper Setting department.

Professional Elective Course (PEC): A professional elective (PEC) course is intended to enhance the depth and breadth of educational experience in the Engineering and Technology curriculum. Multidisciplinary courses that are added supplement the latest trend and advanced technology in the selected stream of engineering. Each group will provide an option to select one course. The minimum number of students' strengths for offering professional electives is 10. However, this conditional shall not be applicable to cases where the admission to the program is less than 10.

Open Elective Courses (OEC): Students belonging to a particular stream of Engineering and Technology are not entitled to the open electives offered by their parent Department. However, they can opt for an elective offered by other Departments, provided they satisfy the prerequisite condition if any. Registration to open electives shall be documented under the guidance of the Program Coordinator/ Advisor/Mentor.

Selection of an Open Elective shall not be allowed if,

- i. The candidate has studied the same course during the previous semesters of the program.
- ii. The syllabus content of open electives is similar to that of the Departmental core courses or Professional Elective courses.
- iii. A similar course, under any category, is prescribed in the higher semesters of the program.
- iv. In case, if any department is interested in offering courses from streams such as Law, Business (MBA), Medicine, Arts, Commerce etc. need to get the necessary approval from the respective Board of Studies and the Academic Council.

The minimum numbers of students' strength for offering Open Elective Course is 10. However, this condition shall not be applicable to class where the admission to the program is less than 10.

Non-Credit Mandatory Courses (NCMC):

National Service Scheme/Physical Education (Sport and Athletics)/ Yoga:

- 1) Securing 40% or more in CIA, 40% or more marks in SEE and 40% or more in the sum total of CIA + SEE leads to successful completion of the registered course.
- 2) In case, students fail to secure 40 % marks in SEE, they have to appear for SEE during the subsequent examinations and obtain the minimum requirement.
- 3) In case, any student fails to register for NSS, PE or Yoga/fails to secure the minimum requirements as mentioned in (B).1, they shall be awarded with NP Grade. In such a case, the student has to fulfill the course requirements during subsequent semester/s.
- 4) Successful completion of the course shall be indicated with a PP Grade in the grade card.
- 5) These courses shall not be considered for vertical progression as well as for the calculation of SGPA and CGPA, but completion of the courses shall be mandatory for the award of degree.

The minimum numbers of student's strength for offering Open Elective Course is 10. However, this condition shall not be applicable to class where the admission to the program is less than 10.

Project Work:

The objective of the Project Work is to

- i. Encourage independent learning and the innovative attitude of the students
- ii. Develop interactive attitude, communication skills, Organization, Time Management and Presentation Skills.
- iii. Impart Flexibility and Adaptability
- iv. Inspire Team working
- v. Expand Intellectual capacity, credibility, judgement and intuition
- vi. Adhere to Punctuality, setting and meeting deadlines
- vii. Install responsibilities to oneself and others
- viii. Train students to present the topic of Project work without any fear, face the audience confidently, enhance communication skills, involve in group discussions to present and exchange ideas.

The CIA and SEE evaluation procedure for the Project work will be as provided by the Board of Studies in line with SCEM Academic Statute 2021 and approved by the Academic Council of SCEM.

Technical Seminar: In order to make the student aware of the technological and research application in various domains of the society, a comprehensive presentation need to be provided with all the supporting evidences for the claims in the presentation.

- The objective of the Technical Seminar is to inculcate self-learning, present the seminar topic confidently, enhance communication skill, involve in group discussion for exchange of ideas.
- Each student, under the guidance of a Faculty, shall choose a topic, preferably a recent topic in their interested specializations.
- The student has to
 - i. Carry out a detailed Literature survey, systematically organize the content
 - ii. Prepare the report as per their own intuition, without cut-paste activities.
 - iii. Use tools for writing equations, drawings etc. and gain proficiency of the tools used.
 - iv. Present the topics effectively through appropriate digital media.
 - v. Answer the queries posed and involve in healthy debates/discussions
 - vi. Submit a report in an error-free and professional way
 - vii. Present the findings of the seminar in the reputed Conferences/Journals for possible publications.

The evaluation procedure for the Technical Seminar will be as provided by the Board of Studies and approved by the Academic Council of SCEM.

21INT82 Research Internship/Industry Internship/Rural Internship

- Research Internship: This is intended to offer the flavor of current research happening in the Research fields. It helps students to get familiarize with the field and imparts the skill required for carrying out research.
- Industry Internship: An extended period of work experience undertaken by the students to supplement their degree for professional development. It also helps them learn to overcome unexpected obstacles and successfully navigate the organizations, perspectives and cultures. Dealing with contingencies helps the students recognize, appreciate and adapt to the organizational realities by tempering their knowledge with practical constraints.
- Rural Internship: A long term goal, as proposed under the AICTE rural internship programme, shall be counted as rural internship activity.
- The student may take up Interdisciplinary Research Internship or Industry Internship.
- The Faculty Mentor need to monitor the student's internship progress and interact with them to guide them for the successful completion of the internship requirements
- The students are permitted to carry out internship anywhere in India or Abroad. However, the institute will not bear any expenses incurred with respect to the internship.

SAHYADRI COLLEGE OF ENGINEERING & MANAGEMENT An Autonomous Institution MANGALURU

PRINCIPLES OF ARTIFICIAL INTELLIGENCE

| (Effective fro | m the Academic Year V SEMESTER | · 2023 - 2024) | | | | | | |
|---|-----------------------------------|----------------|----|--|--|--|--|--|
| Course Code | 21AI51 | CIA Marks | 50 | | | | | |
| Number of Contact Hours/Week (L: T: P: S) | 3:0:2:0 | SEE Marks | 50 | | | | | |
| Total Hours of Pedagogy | 40L + 20P | Exam Hours | 03 | | | | | |
| CREDITS – 4 | | | | | | | | |

COURSE PREREQUISITES:

• Fundamental knowledge of mathematical concepts, analytical skills and programming.

COURSE OBJECTIVES:

- Gain a historical perspective of AI and its foundations.
- Learn the methods of solving problems using AI.
- Learn the knowledge representation techniques, logic concepts and planning.
- Investigate applications of AI techniques in expert systems.

TEACHING - LEARNING STRATEGY:

Following are some sample strategies that can be incorporate for the Course Delivery

- Chalk and Talk Method/Blended Mode Method
- Power Point Presentation
- Expert Talk/Webinar/Seminar
- Video Streaming/Self-Study/Simulations
- Peer-to-Peer Activities
- Activity/Problem Based Learning
- Case Studies
- MOOC/NPTEL Courses
- Any other innovative initiatives with respect to the Course contents

COURSE CONTENTS

MODULE - I

Introduction to AI: Intelligent systems, Foundations and Sub area of AI, Applications, Tic-Tac-Toe Game playing, Currents trend and developments of AI, General problem solving, Characteristics of Problem, Constraint satisfaction.

MODULE - II

Search Techniques and Game playing: Exhaustive searches, Heuristic search techniques, Game playing,8Bounded look-ahead strategy, Alpha-beta pruning, Two-player perfect information games.Hours

MODULE - III

Logic concepts and Prolog Programming concepts:Propositional calculus, Propositional logic, Natural
deduction system, Axiomatic system, Semantic tableau system in Propositional logic, Prolog program,
Control strategy of prolog, Programming techniques in prolog, List manipulation in prolog, Structuring
of data in prolog, Recursive data types in prolog.8Hours

MODULE - IV

Planning and Knowledge Representation:Types of planning systems, Block world problem, Logic basedplanning, Linear planning using Goal stack, Means-Ends analysis, Approaches to knowledge representation,
Knowledge representation using semantic network, Knowledge representation using frames.8Hours

MODULE - V

Expert system and Applications: Phases in building expert systems, Architecture of expert system, Expert8system versus traditional systems, Rule-based expert systems, Blackboard systems, Truth maintenance8systems, Application of expert systems.Hours

SAHYADRI COLLEGE OF ENGINEERING & MANAGEMENT An Autonomous Institution MANGALURU

MATHEMATICS FOR MACHINE LEARNING

| (Effective from the Academic Year 2023 - 2024) |
|--|
|--|

V SEMESTER

| V SEIVIESTER | | | | | | | |
|---|-----------|------------|----|--|--|--|--|
| Course Code | 21AI52 | CIA Marks | 50 | | | | |
| Number of Contact Hours/Week (L: T: P: S) | 3:0:2:0 | SEE Marks | 50 | | | | |
| Total Hours of Pedagogy | 40L + 20P | Exam Hours | 03 | | | | |
| CREDITS – 4 | | | | | | | |

COURSE PREREQUISITES:

• Fundamentals of Statistics, Linear algebra and Vector algebra.

COURSE OBJECTIVES:

- Enable the students to understand the advance concepts of Linear algebra
- Familiarize the importance of vector calculus associated with one variable and two variables for engineering.
- Understand the concept of probability and enable the students to predict the outcome of simple experiments
- Understand the concept of optimization techniques

TEACHING - LEARNING STRATEGY:

Following are some sample strategies that can be incorporate for the Course Delivery

- Chalk and Talk Method/Blended Mode Method
- Power Point Presentation
- Expert Talk/Webinar/Seminar
- Video Streaming/Self-Study/Simulations
- Peer-to-Peer Activities
- Activity/Problem Based Learning
- Case Studies
- MOOC/NPTEL Courses
- Any other innovative initiatives with respect to the Course contents

COURSE CONTENTS

MODULE - I Linear Algebra-Part1: Introduction, Matrices, System of Linear Equations, Vector Spaces, Linear Dependence and Independence, Gaussian Elimination, Basis and basis set, Rank, Norms, Inner Products, Lengths and Distances, Angles. 8 Hours

MODULE - II

Linear Algebra-Part2: Orthogonality, Orthonormal Basis, Orthogonal Complement Rotations, Determinant
and Trace, Eigenvalues and Eigenvectors – its interpretations, Projections, Regression, Diagonalization,
Singular Value Decomposition8 Hours

MODULE - III

Vector Calculus: Introduction, Differentiation of Uni-variate Functions, Partial Differentiation and
Gradients, Gradients of Vector-Valued Functions, Gradients of Matrices, Useful Identities for
Computing Gradients, Backpropagation.8 Hours

MODULE - IV

Probability and Distribution: Probability concepts, Conditional probability, Bayes' Theorem, Discrete and
Continuous Random Variables and Distributions, Expectation and its Interpretations, Standard discrete and
continuous distribution functions, Central Limit theorem8 Hours

MODULE - V

Optimization: Introduction, Optimization Using Gradient Descent, Constrained Optimization and Lagrange **8 Hours** Multipliers, Convex Optimization.

COURSE OUTCOMES

COURSE CONTENTS

MODULE - I

Introduction to Automata Theory: Overview and Applications of Automata Theory, The Central
Concepts of Automata Theory.8 HoursFinite Automata: Deterministic Finite Automata; Nondeterministic Finite Automata, Equivalence of
Deterministic and Nondeterministic Finite Automata, An Application of Finite Automata: Text Search,
Finite Automata with Epsilon-transitions.8 Hours

| | MODULE - II | |
|-----------|---|------------------------------|
| Regular | • Expressions and Languages: Regular Expressions; Finite Automata and Regular Expressions; | 8 Hours |
| Applicat | tions of Regular Expressions. | |
| Propert | ies of Regular Languages: Proving Languages Not To Be Regular; Closure Properties of Regular | |
| Languag | ges; Equivalence and Minimization of Automata. | |
| | MODULE - III | |
| Context | -Free Grammars and Languages: Context-Free Grammars; Parse Trees; Applications of Context- | 8 Hours |
| Free Gra | ammars, Ambiguity in Grammars and Languages. | |
| Pushdo | wn Automata: Definition of the Pushdown Automaton (PDA); The Languages of a PDA; Design | |
| of PDA | ; Equivalence of PDA's and CFG's - Conversion from CFG to PDA and vice versa; Deterministic | |
| Pushdov | vn Automata. | |
| | MODULE - IV | |
| Propert | ies of Context-Free Languages: Normal Forms for Context-Free Grammars; The Pumping Lemma | 8 Hours |
| for Cont | ext-Free Languages; Closure Properties of Context-Free Languages. | |
| Turing | Machine: Turning Machine Model; Representation of Turing Machine, Language Acceptability by | |
| Turing N | Machine, Design of Turing Machines, Techniques for Turning Machine Construction. | |
| | MODULE - V | |
| Variant | s of Turing Machines (TM): Nondeterministic Turing Machine, Multi Tape Turing Machine, The | 8 Hours |
| Model o | f Linear Bounded Automaton. | |
| Decidat | bility and Recursively Enumerable Languages: Decidability, Decidable Languages, Undecidable | |
| Languag | ges, Halting Problem of Turing Machine, The Post Correspondence Problem. | |

DATABASE MANAGEMENT SYSTEMS

| (Effective from the Academic Year 2023 - 2024) V SEMESTER | | | | | | | | | |
|--|---------|------------|----|--|--|--|--|--|--|
| Course Code | 21CS54 | CIA Marks | 50 | | | | | | |
| Number of Contact Hours/Week (L: T: P: S) | 3:0:0:0 | SEE Marks | 50 | | | | | | |
| Total Hours of Pedagogy | 40L | Exam Hours | 03 | | | | | | |
| CREDITS – 3 | | | | | | | | | |

COURSE PREREQUISITES:

• Knowledge of Data Structures

COURSE OBJECTIVES:

- Provide a Strong foundation in Database concepts, Technology and practice.
- Practice SQL programming through a variety of database problems.
- Demonstrate the use of concurrency and transactions in database.
- Design and build database applications for real world problems.

TEACHING - LEARNING STRATEGY:

Following are some sample strategies that can be incorporate for the Course Delivery

- Chalk and Talk Method/Blended Mode Method
- Power Point Presentation
- Virtual Lab
- Expert Talk/Webinar/Seminar
- Peer-to-Peer Activities
- Problem Based Learning
- MOOC/NPTEL Courses
- Any other innovative initiatives with respect to the Course contents

COURSE CONTENTS

MODULE - I

Introduction to Databases: Overview, Characteristics of database approach, Actors on the Scene, Workers behind the Scene, Advantages of using the DBMS approach, History of database applications (Self Study).

Database System Concepts and Architecture: Data Models, Schemas, and Instances. Three schema architecture and data independence, database languages, and interfaces, The Database System environment.

Basic SQL: SQL data definition and data types, specifying constraints in SQL, retrieval queries in SQL, INSERT, DELETE, and UPDATE statements in SQL.

MODULE - II

Data Modeling Using the Entity-Relationship (ER) Model: Entity types, Entity sets, attributes, roles, and
structural constraints, Weak entity types, ER diagrams, Relationship Types of Degree Higher than Two,
Examples.8 HoursRelational Database Design by ER-to-Relational Mapping: Relational Database Design using ER-to-
Relational mapping.8 HoursThe Relational Data Model and Relational Database Constraints: Relational Model Concepts,
Delational Mach Concepts,9 Hours

Relational Model Constraints and relational database schemas, Update operations, transactions, and dealing with constraint violations.

| MODOLE - III | | | | | | | | |
|--|---------|--|--|--|--|--|--|--|
| The Relational Algebra: Unary Relational Operations: SELECT and PROJECT, Relational Algebra | 8 Hours | | | | | | | |
| Operations from Set Theory, Binary Relational Operations: JOIN and DIVISION, Additional relational | | | | | | | | |
| operations (aggregate, grouping, etc.), Examples of Queries in relational algebra. | | | | | | | | |
| Advanced SQL: More complex SQL retrieval queries, Specifying constraints as assertions and action | | | | | | | | |
| triggers, Views in SQL, Schema change statements in SQL. | | | | | | | | |
| MODULE - IV | | | | | | | | |

| Basics of Functional Dependencies and Normalization for Rela | tional | | | | | | | | | | |
|---|---|------------|---------|-----------|----------|---------------------|--|--|--|--|--|
| | Databas | ses: Inf | ormal I | Design | 8 Hours | | | | | | |
| Guidelines for Relation Schemas, Functional Dependencies, Norm | lines for Relation Schemas, Functional Dependencies, Normal Forms based on Primary Keys, | | | | | | | | | | |
| General Definitions of Second and Third Normal Forms, Boyce-Codd | ral Definitions of Second and Third Normal Forms, Boyce-Codd Normal Form. | | | | | | | | | | |
| Relational Database Design Algorithms and Further Dependencie | | | | | | | | | | | |
| Minimal Cover, Properties of Relational Decompositions, Algorithm | | | | | | | | | | | |
| Design. | | | | | | | | | | | |
| MODULE - V | | | | | | | | | | | |
| о г | duction to Transaction Processing Concepts and Theory: Introduction to Transaction Processing, 8 Hour | | | | | | | | | | |
| | action and System concepts, Desirable properties of Transactions, Characterizing schedules based on | | | | | | | | | | |
| verability, Characterizing schedules based on Serializability, Transaction support in SQL. | | | | | | | | | | | |
| | ncurrency Control Techniques: Two-phase locking techniques for Concurrency control, Concurrency | | | | | | | | | | |
| control based on Timestamp ordering. | ~ | | | ~~~~~~ | | | | | | | |
| Introduction to NOSQL Databases: Emergence of NOSQL Systems | , Charac | eteristics | s of NO | SQL Sys | stems, | | | | | | |
| Categories of NOSQL Systems. | | | | | | | | | | | |
| COURSE OUTCOM | IES | | | | | | | | | | |
| Upon completion of this course, the students will be able to: | | | | | | Bloom's | | | | | |
| CO No. Course Outcome Descrip | Course Outcome Description | | | | | | | | | | |
| CO1 Discuss the concepts of database technology and illustrat (SQL) for database manipulation. | Level Discuss the concepts of database technology and illustrate the Structured Query Language (SQL) for database manipulation. CL3 | | | | | | | | | | |
| CO2 Make use of Entity Relationship (ER) model to illustrative describe the basic principles of relational model. | 2 Make use of Entity Relationship (ER) model to illustrate conceptual database design and describe the basic principles of relational model. | | | | | | | | | | |
| CO3 Examine the concepts of relational algebra and advance development | Examine the concepts of relational algebra and advanced SQL in database application | | | | | | | | | | |
| | Apply the functional dependency to measure the appropriateness of attribute groupings into relation schemas and discuss the process of normalization with its algorithms. | | | | | | | | | | |
| | Explain the concepts and theory needed for transaction processing concurrency control in | | | | | | | | | | |

Note: For Examinations (both CIE and SEE), the question papers shall contain the questions mapped to the appropriate Bloom's Level. Any COs mapped with higher cognitive Bloom's Level may also be assessed through the assignments.

ASSIGNMENT TYPES WITH WEIGHTAGES

| SI. No. | Assignment Description | Max. Weightage (%) | Max. Marks |
|------------|--|--------------------|------------|
| 1 | Written Assignments | 25 % | 05 |
| 2 | Quiz | 10 % | 02 |
| 3 | Case Studies | 25 % | 05 |
| 4 | Seminar/Presentation | 15 % | 03 |
| 5 | Peer - to - Peer Learning | 10 % | 02 |
| 6 | Activity Based Learning | 50 % | 10 |
| 7 | Project Based Learning | 50 % | 10 |
| 8 | Field Work + Report | 50 % | 10 |
| 9 | Industry Visit + Report | 50 % | 10 |
| 10 | NPTEL/MOOC Courses – Registration and Assignment Submissions | 50 % | 10 |
| | NPTEL Certification | 75 % | 15 |
| 11 | Any other Innovative Assignments (CL4 and above) | 50 % | 10 |

Note: The assignments mentioned above may be provided appropriately to the students belonging to different bands **SEE OUESTION PAPER PATTERN:**

- The question paper will have **TEN** full questions from **FIVE** Modules
- There will be 2 full questions from each module. Every question will carry a maximum of 20 marks.
- Each full question may have a maximum of four sub-questions covering all the topics under a module.
- The students will have to answer FIVE full questions, selecting one full question from each module.

| Course Code | 21CSL55 | CIA Marks | 50 | | | | |
| Number of Contact Hours/Week (L: T: P: S) | 0:0:2:0 | SEE Marks | 50 | | | | |
| Total Hours of Pedagogy | 20P | Exam Hours | 03 | | | | |
| CREDITS – 1 | | | | | | | |

COURSE PREREQUISITES:

Basics of SQL

COURSE OBJECTIVES:

- Foundation knowledge in database concepts, technology and practice to groom students into well-informed database application developers.
- Strong practice in SQL programming through a variety of database problems.
- Develop database applications using front-end tools and back-end DBMS.

TEACHING - LEARNING STRATEGY:

Following are some sample strategies that can be incorporate for the Course Delivery

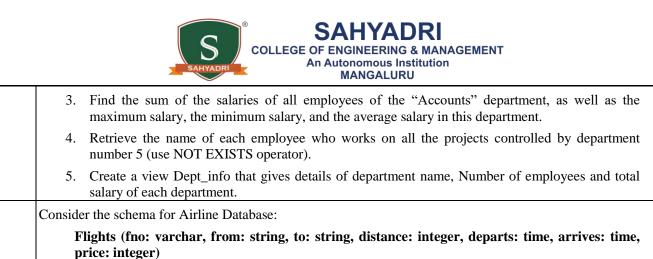

- Chalk and Talk Method/Blended Mode Method
- Power Point Presentation
- Expert Talk/Webinar/Seminar
- Video Streaming/Self-Study/Simulations
- Peer-to-Peer Activities
- Activity/Problem Based Learning
- Case Studies
- MOOC/NPTEL Courses
- Any other innovative initiatives with respect to the Course contents

LIST OF EXPERIMENTS

| CI | | | | | | | | | | |
|------------|--|--|--|--|--|--|--|--|--|--|
| SI. No. | Description | | | | | | | | | |
| Pre-rec | re-requisite: Introduction to SQL. Demonstrate the Basic Database operations. | | | | | | | | | |
| | Part-A | | | | | | | | | |
| | Consider the following schema for Bank Database: | | | | | | | | | |
| | BRANCH(bid: varchar, bname:string, branch-city:string, assets:integer) | | | | | | | | | |
| | ACCOUNT(accno:int, branch-name:string, balance:integer) | | | | | | | | | |
| | DEPOSITOR(customer-name:string, accno:int) | | | | | | | | | |
| | CUSTOMER(Cid:varchar, customer-name:string, customer-street:string, customer-city:string) | | | | | | | | | |
| | LOAN(loan-number:int, branch-name:string, amount:integer, cid:varchar) | | | | | | | | | |
| 1 | Write SQL queries to | | | | | | | | | |
| _ | 1. Find all the customers who have at least one account at the "Mangaluru" branch. | | | | | | | | | |
| | 2. Find all the customers who have an account at all the branches located in a specific city. | | | | | | | | | |
| | 3.Retrieve the Customer name and loan amount of a customer who borrowed a loan more than 5,00,000. | | | | | | | | | |
| | 4. Retrieve the details of bank branch with maximum assets. | | | | | | | | | |
| | 5. Demonstrate how you delete all account tuples at every branch located in a specific city | | | | | | | | | |
| 2 | Consider the following schema for a Library Database: | | | | | | | | | |
| 2 | BOOK(Book_id:varchar, Title:string, Publisher_Name:string, Pub_Year:integer) | | | | | | | | | |

| | BOOK_AUTHORS(Book_id:varchar, Author_Name:string) | | | | | | |
|---|--|--|--|--|--|--|--|
| | PUBLISHER(Name:string, Address:string, Phone:integer) | | | | | | |
| | BOOK_COPIES(Book_id:varchar, Programme_id:varchar, No-of_Copies:integer) | | | | | | |
| | BOOK_LENDING(Book_id:varchar, Programme_id:varchar, Card_No:varchar, Date_Out:date, Due_Date:date) | | | | | | |
| | LIBRARY_PROGRAMME(Programme_id:varchar, Programme_Name:string, Address:string) | | | | | | |
| | Write SQL queries to | | | | | | |
| | 1. Retrieve details of all books in the library – id, title, name of publisher, authors, number of copies in each Programme, etc. | | | | | | |
| | 2.Get the particulars of borrowers who have borrowed more than 3 books, but from Jan 2023 to Jun 2023. | | | | | | |
| | 3.Delete a book in BOOK table. Update the contents of other tables to reflect this data manipulation operation. | | | | | | |
| | 4. Partition the BOOK table based on year of publication. Demonstrate its working with a simple query. | | | | | | |
| | 5. Create a view of all books and its number of copies that are currently available in the Library | | | | | | |
| | Consider the schema for College Database: | | | | | | |
| | STUDENT(USN, SName, Address, Phone, Gender) | | | | | | |
| | SEMSEC(SSID, Sem, Sec) | | | | | | |
| | CLASS(USN, SSID) | | | | | | |
| | COURSE(Subcode, Title, Sem, Credits) | | | | | | |
| | IAMARKS(USN, Subcode, SSID, Test1, Test2, Test3, FinalIA) | | | | | | |
| | Write SQL queries to | | | | | | |
| | 1. List all the student details studying in fourth semester "C" section. | | | | | | |
| 3 | 2. Compute the total number of male and female students in each semester and in each section. | | | | | | |
| | 3. Create a view of Test1 marks of student USN "4SF20CD001" in all Courses. | | | | | | |
| | 4. Calculate the FinalIA (average of three test marks) and update the corresponding table for all students. | | | | | | |
| | 5. Categorize students based on the following criterion: | | | | | | |
| | If FinalIA = 45 to 50 then CAT = "Outstanding" | | | | | | |
| | If FinalIA= 40 to 45 then CAT= "Good" | | | | | | |
| | If FinalIA = 30 to 40 then CAT = "Average" | | | | | | |
| | If FinalIA< 30 then CAT = "Weak" | | | | | | |
| | Give these details only for 8th semester A, B, and C section students. | | | | | | |
| | Consider the schema for Company Database: | | | | | | |
| | EMPLOYEE (Eid:varchar, Name:string, Address: string, Gender:string, Salary: integer, SuperEid: varchar, Dno: varchar) | | | | | | |
| | DEPARTMENT (Dnum: varchar, Dname: string, DMgr_id:varchar, Mgr_start_date: date) | | | | | | |
| | DLOCATION (Dno: varchar, Dlocation:string) | | | | | | |
| | PROJECT (Pnum:varchar, Pname: string, Plocation:string, Dno:varchar) | | | | | | |
| 4 | WORKS_ON (Eid: varchar, Pno: varchar, Hours: integer) | | | | | | |
| | DEPENDENT (Empid: varchar, Dep_name:string, Gender:string, Bdate:date, Relationship:String) | | | | | | |
| | Write SQL queries to | | | | | | |
| | 1. Make a list of all project numbers for projects that involve an employee whose name is "Rahul", either as a worker or as a manager of the department that controls the project. | | | | | | |
| | 2. Show the resulting salaries if every employee working on the "IoT" project is given a 10 percent raise. | | | | | | |

Aircraft (aid: varchar, aname: string, cruisingrange: integer)

Certified (eid: varchar, aid: varchar)

Employees (eid: varchar, ename: string, salary: integer)

Note: The Employees relation describes pilots and other kinds of employees as well; Every pilot is certified for some aircraft, and only pilots are certified to fly.

- 5 Write SOL queries to
 - 1. Find the names of aircraft such that all pilots certified to operate them have salaries more than Rs.80, 000.
 - 2. For each pilot who is certified for more than three aircrafts, find the eid and the maximum cruisingrange of the aircraft for which she or he is certified.
 - Find the names of pilots whose salary is less than the price of the cheapest route from Bengaluru 3. to Mumbai.
 - Find the aids of all aircraft that can be used on routes from Bengaluru to New Delhi. 4.
 - T. 1.1 1 1 . 11.1

| | 5. Find the employee name and salary earning second highest salary. | | | | | |
|-----------|--|------------------------------|--|--|--|--|
| | Part-B: Mini Project | | | | | |
| | For any societal problem statement selected. Make sure that the application should have five or more tables, one trigger and one Procedure. Mobile Applications are strictly prohibited. The mini project team may consist of maximum two members. The areas for problem statement may include, but not limited to the following : | Stored | | | | |
| | Educational sector Environmental issues Healthcare | | | | | |
| | Women empowerment Child care | | | | | |
| | Banking sector COURSE OUTCOMES | | | | | |
| Upon cor | npletion of this course, the students will be able to: | | | | | |
| CO No. | Course Outcome Description | Bloom's Taxonomy Level | | | | |
| CO1 | Use SQL programming and different concepts of DBMS to create, update and query on the Bank and Library databases. | CL3 | | | | |
| CO2 | Demonstrate SQL programming and different concepts of DBMS to create, update and query on the College database. | | | | | |
| CO3 | Illustrate the concepts of SQL programming and DBMS to create, update and query on the Company database. | CL3 | | | | |
| CO4 | Create, update and query on the Airline database by using different concepts of DBMS and SQL programming. | CL3 | | | | |

| CO No. | CO-PO-PSO MAPPING Programme Outcomes (PO) | | | | | | | | | | | Specific | Programme Specific Outcome (PSO) | |

& MANAGEMENT

utonomous Institution MANGALURU

II. In Laboratory Courses where (C) is not a component of the assessment pattern, then (A) will have 50% weightage (25 Marks), and (B) will have 50% weightage (25 Marks).

Assessment Mode: The marks will be awarded based on the Continuous Internal Assessment (Weekly Assessment) (A) and One Laboratory Test (B).

- In Weekly Assessment, the student will be evaluated in each laboratory session for 25 marks. The average marks obtained across all the experiments will be the marks obtained for (A).
- A Laboratory Test, similar to the SEE exam is conducted towards the end of the Semester/Course, whichever is earlier. The obtained marks are scaled down to 25 Marks (B)

The Sum of marks obtained across (A) and (B) will be the Final CIA marks.

- III. In Laboratory Courses where (C) is a component of the assessment pattern, then assessment will be done by considering the weightages given above, i.e. (A) 25 Marks (Weekly Assessment), (B) 15 Marks (Laboratory Examination), (C) 10 marks (Open Ended Experiments/Mini Projects)
 - The respective course instructor will design the assessment criteria for the said assessment components.
 - The assessment components will be made known to the students by the respective Course Coordinators prior to the commencement of the Laboratory Work.

In all the cases, the assessments will be done based on the criteria designed by the Course Coordinator.

SEE QUESTION PAPER PATTERN:

- 1. All laboratory experiments should be included for practical examination, from which students are allowed to pick one experiment from the lot.
- 2. SEE shall be conducted for 100 Marks and the marks will be scaled down to 50.
- 3. General Marks Distribution: Procedure + Conduction + Viva = 20% + 50% + 30%.

4. Change of experiment is allowed only once and 20% of the marks allotted to the Procedure will be made ZERO (if a question carries two experiments, both should be changed). The evaluation will be done for 80% of the total maximum marks.

RESEARCH METHODOLOGY & INTELLECTUAL PROPERTY RIGHTS

| (Effective from the Academic Year 2023- 2024) | | | | | | | | |
|---|---------|------------|----|--|--|--|--|--|
| V SEMESTER | | | | | | | | |
| Course Code | 21IPR57 | CIA Marks | 50 | | | | | |
| Number of Contact Hours/Week (L: T: P: S) | 1:2:0:0 | SEE Marks | 50 | | | | | |
| Total Hours of Pedagogy | 30L | Exam Hours | 03 | | | | | |
| CREDITS – 2 | | | | | | | | |

COURSE PREREQUISITES:

• A foundational understanding of research and knowledge of research problem formulation, familiarity with academic ethics, a basic understanding of statistics and data analysis, ability to search and evaluate academic sources, basic writing and communication skills, critical thinking skills, time management skills and awareness of ethical considerations in research.

COURSE OBJECTIVES:

- Understand the basic concepts, principles, and types of research methodologies
- Collect, analyze, and interpret data using relevant techniques.
- Ethically conduct research and adhere to academic integrity.
- Communicate research findings effectively through written and oral presentations.
- Understand the intellectual property rights and the types of IPR.

TEACHING - LEARNING STRATEGY:

Following are some sample strategies that can be incorporated into the Course Delivery

- Chalk and Talk Method/Blended Mode Method
- PowerPoint Presentation
- Expert Talk/Webinar/Seminar
- Video Streaming/Self-Study/Simulations
- Peer-to-Peer Activities
- Activity/Problem-Based Learning
- Case Studies
- MOOC/NPTEL Courses
- Any other innovative initiatives with respect to the Course contents

COURSE CONTENTS

MODULE - I

| Introduction to Research Methodology and Literature Review | 6 Hours |
|---|---------|
| Introduction to Research Methodology: Meaning of research, Objectives of research, Types of | |
| research, Importance of scientific research in decision making, Defining the research problem, | |
| techniques involved in defining a problem. Research Design: Meaning of research design, need for | |
| research design, Features of good design. | |
| | |
| Literature Review: Significance of literature review, Sources for literature: Books, Journals, | |
| Proceedings, Thesis and Dissertations. Online databases: Web of Science, Google and Google Scholar. | |
| Quality research papers. Research metrics: Citation, Citation Index, Impact Factor, H-index, i10-index, | |
| Google index and their significance. | |
| MODULE - II | |
| Data Collection, Analysis and Report Writing | 6 Hours |
| Data Collection: Introduction, collection of primary data: observation method, questionnaires and case | |
| study method, collection of secondary data, Selection of an appropriate method for data collection. | |
| Data Analysis : Introduction, Data analysis process, Types of data analysis, Methods of data analysis: | |
| Data Analysis. Introduction, Data analysis process, Types of data analysis, wethous of data analysis. | |

Qualitative analysis, Quantitative analysis. Tools for data analysis.

Report Writing: Effective technical writing, Steps for writing a report, structure of the research report, method of writing a research article (manuscript)/ research report, crafting effective project proposals, Paper writing for National and international journals, Submitting papers to journals (Scopus Indexed Journals, Science Citation Indexed journals), preparation of effective slides, pictures, and graphs for presentation. **MODULE - III Ethics in Research** 6 Hours Ethics with respect to research, ethical principles, the importance of adhering to ethical norms in research, research misconducts, plagiarism, penalties for plagiarism, publication ethics, conflict of interest, publication misconduct, violation of publication ethics and authorships, identification of publication misconduct, complaints and appeals (examples) and Open Access Publishing. **MODULE - IV Intellectual Property Rights, Patents and Industrial Designs:** 6 Hours **Intellectual Property Rights:** Introduction to intellectual property and intellectual property rights, objectives of IPR, History of IPR in India, Role of WIPO and WTO in IPR establishments, Types of Intellectual property rights. Patents: Introduction to patent, need and importance of a patent, requirements of patent, types of patents, few famous examples of patent, patentable and non-patentable items, Duration, limitations of a patent, the Indian Patent Act-1970, Rights associated with patents, Enforcement of patent rights, Patent infringements. Case Studies on Patents: Case study of Curcuma (Turmeric) Patent, Case study of Neem Patent, Case study of Basmati patent Industrial Designs: Design introduction, Features of Design, Design law 2000, Registration of Design, Need for registration of Design, Procedure for registration of Design, Infringement of Design. Famous Case Law: Apple Inc. vs. Samsung Electronics Co. **MODULE - V Copyrights, Trademarks and Geographical Indications:** 6 Hours **Copyrights:** Introduction to copyright, characteristics of copyright, copyright-National Vs international, Indian copyright Act-1957, Indian perspective on copyright, Term/duration of copyright, registration of copyright, copyright symbol, procedure of copyright certification, benefits of copyright registration, copyright infringement, limitations of copyright. Trademarks: Introduction to Trademark, signs which may serve as Trademarks, functions of Trademark, Essential features of Trademark, Types of Trademark, the validity of the trademark, Unfair competition, Trademark Act 1999, Infringement of Trademark, Famous case law: Coca-Cola Company vs. Bisleri International Pvt. Ltd. Geographical Indications: Introduction to G.I, History of G.I, G.I Act 1999, Registration of G.I, Registration process of G.I, Duration of G.I Tag, Infringement of G.I, Some important G.I Tags. **COURSE OUTCOMES** Upon completion of this course, the students will be able to: Bloom's CO Taxono **Course Outcome Description** No. my Level C01 Comprehend the process of research methodology to define a research problem. CL2 CO2 Understand the analytical tools for the analysis and interpretation of data.

Understand the research ethics and adhere to ethical norms in the research process.

- Assessment will be both CIA and SEE.
- The assignment of the IPCC shall be for CIE only.
- The Theory component of the IPCC shall be for both CIA and SEE respectively.

Note: For Examinations (both CIE and SEE), the question papers shall contain the questions mapped to the appropriate Bloom's Level. Any COs mapped with higher cognitive Bloom's Level may also be assessed through the assignments.

SEE QUESTION PAPER PATTERN:

- 1. The question paper will have TEN full questions from FIVE Modules
- 2. There will be 2 full questions from each module. Every question will carry a maximum of 20 marks.
- 3. Each full question may have a maximum of four sub-questions covering all the topics under a module.
- 4. The students will have to answer FIVE full questions, selecting one full question from each module.

Assignments:

- **1.** Case Study: Conduct a literature survey on a suitable research topic and prepare a report with a minimum of 10 references that adheres to standard journal specifications.
- **2.** Case Study: Download 5 quality research papers published within the last five years from reputed journals on the topic of your choice and provide your analysis and perspective on the chosen topic
- 3. Case Study: Conduct a prior art search using free online databases and prepare a report.

ENVIRONMENTAL STUDIES

| (Effective from the Academic Year 2023 - 2024) | | | | | | | | |
|--|---------|------------|----|--|--|--|--|--|
| V SEMESTER | | | | | | | | |
| Course Code | 21ENV58 | CIA Marks | 50 | | | | | |
| Number of Contact Hours/Week (L: T: P: S) | 1:0:0:0 | SEE Marks | 50 | | | | | |
| Total Hours of Pedagogy | 16L | Exam Hours | 01 | | | | | |
| CREDITS – 1 | | | | | | | | |

COURSE PREREQUISITES:

• Fundamental knowledge of Ecosystems, Environment Pollution and its effects.

COURSE OBJECTIVES:

- To create environmental and sustainability awareness among the students.
- To educate the students to understand the various environmental pollutants, waste management techniques, and the legal framework governing environmental protection.

TEACHING - LEARNING STRATEGY:

Following are some sample strategies that can be incorporate for the Course Delivery

- Chalk and Talk Method/Blended Mode Method
- Power Point Presentation
- Expert Talk/Webinar/Seminar
- Video Streaming/Self-Study/Simulations
- Peer-to-Peer Activities
- Activity/Problem Based Learning
- Case Studies
- MOOC/NPTEL Courses
- Any other innovative initiatives with respect to the Course contents

COURSE CONTENTS

MODULE - I Ecosystem and Sustainability: Structure and Function of ecosystems in Forest, Desert, Wetlands, River, **3 Hours** Oceanic and Lakes. Sustainability: 17 SDGs- History, targets, implementation, Capacity Development. Success stories - Best practices related to ecosystem conservation and sustainable computing and IT practices. **MODULE - II** Advances in Energy Systems and Sustainable Practices: Hydrogen, Solar, OTEC, Tidal, and Wind **3** Hours energy systems: Merits and Demerits. Global status and applications of renewable energy sources. Concepts and case studies in disaster management with a focus on technology and data-driven solutions. Sustainable mining practices and their environmental impact. Carbon trading and its role in reducing carbon emissions in the IT industry. **MODULE - III Environmental Pollution, Global Issues, and Health** 4 Hours Environmental Pollution: Sources, impacts, and control of surface and ground water pollutants. Soil

Environmental Pollution: Sources, impacts, and control of surface and ground water pollutants. Soil pollutants and their effects on ecosystems. Air pollutants and their consequences on air quality. Radon and fluoride concentration in drinking water and potential health risks. Environmental toxicology - causes and control measures.

| MODULE - IV | | | | |
|---|---------|--|--|--|
| E-Waste and Plastic Waste Management | 3 Hours | | | |
| Solid waste management: sources, characteristics, health hazards, and disposal methods of E-Waste and | | | | |
| Plastic waste. | | | | |
| Different approaches of recycling and metal recovery from E-Waste. Role of stake holders in environmental | | | | |
| management of e-waste (producers, consumers, recyclers, and statutory bodies). Strategies for plastic | | | | |

pollution control.

MODULE - V

An Autonomous Institution MANGALURU

MANAGEMENT

3 Hours

Sustainable Green Technologies

Sustainable agriculture practices and green technologies. Waste-to-Energy Technologies. Introduction to circular economy principles and green data center technologies in IT sectors. Green certification. Marine conservation.

COURSE OUTCOMES

| CO No. | Course Outcome Description | | | | |
|-----------|--|-----|--|--|--|
| CO1 | Summarize the role of IT Engineers in maintaining the ecosystem functionalities and sustainable development in the field of environmental science. | CL2 | | | |
| CO2 | Understand the advances in energy systems and approaches relevant to natural resource management. | CL2 | | | |
| CO3 | Illustrate the sources, impacts & control of environmental pollution and understand the process involved in sustainable agriculture and marine conservation. | CL2 | | | |
| CO4 | Identify the sources of environmental pollution, measures for control and understand the process involved in E-Waste management. | CL2 | | | |
| CO5 | Understand the importance of Eco- friendly Technologies in the conservation of biological diversity | CL2 | | | |

- The Question paper will have **FIFTY** multiple choice questions covering the entire five module syllabus.
- Each question may have a maximum of four sub-questions and each question will be for 01 mark.
- Examination will be **ONLINE** and students will have to answer all the questions.
- The Duration of the Exam will be 01 hour.

REFERENCE BOOKS:

- 1. Environmental Studies, Benny Joseph, Tata Mc Graw Hill., 2ndEdition, 2012.
- 2. Environmental Studies, S M Prakash, Pristine Publishing House, Mangalore, 3rdEdition, 2018.
- 3. Environmental Studies From Crisis to Cure, R Rajagopalan, Oxford Publisher, 2005

Activity-Based Learning (Suggested Activities in Class)/ Practical Based learning

Field work: Visit to Zero Waste Management Plant / Solid waste management plant/Biogas production plant.

SAN YADKI COLLEGE OF ENGINEERING & MANAGEMENT An Autonomous Institution MANGALURU

MongoDB

(Effective from the Academic Year 2023 - 2024)

| V SEMESTER | | | | | | | | |
|---|---------|------------|----|--|--|--|--|--|
| Course Code | 21CS591 | CIA Marks | 50 | | | | | |
| Number of Contact Hours/Week (L: T: P: S) | 0:0:2:0 | SEE Marks | 50 | | | | | |
| Total Hours of Pedagogy | 20P | Exam Hours | 03 | | | | | |
| CREDITS – 1 | | | | | | | | |

PREREQUISITES:

- Fundamental knowledge of any programming language
- Basic understanding of any database, SQL, and query language for databases
- Working knowledge of Linux or Unix-based systems (recommended, but not mandatory)

COURSE OBJECTIVES:

- Able to demonstrate a solid understanding of MongoDB fundamentals, including its NoSQL architecture, key features, and the advantages it offers over traditional relational databases.
- Acquire the skills to perform advanced data manipulation using MongoDB, including CRUD operations, indexing strategies, and complex querying techniques.
- Develop practical skills in MongoDB application development, integrating MongoDB with popular programming languages.

TEACHING - LEARNING STRATEGY:

Following are some sample strategies that can be incorporate for the Course Delivery

- Chalk and Talk Method/Blended Mode Method
- Power Point Presentation
- Expert Talk/Webinar/Seminar
- Video Streaming/Self-Study/Simulations
- Peer-to-Peer Activities
- Activity/Problem Based Learning
- Case Studies
- MOOC/NPTEL Courses
- Any other innovative initiatives with respect to the Course contents

LIST OF EXPERIMENTS

| Sl. No. | Description |
|------------|---|
| 1 | MongoDB installation and configuration in windows. |
| 2 | Demonstrate how to create and drop database in MongoDB. |
| 3 | Creating the Collection in MongoDB. |
| 4 | Creating collection with options before inserting the documents and drop the collection created. |
| 5 | MogoDB Insert Document a. Insert single document. b. Insert multiple documents in collection. |
| 6 | Querying all the documents in json format and Querying based on the criteria. |

| | Mong | oDB up | date doc | ument | | | | | | | | | | |

SAHYADRI

Assessment Mode: Weekly Assessment of Laboratory Work (50 Marks) - the marks will be awarded based on

I. In Laboratory Courses where (B) and (C) are not the components of the assessment pattern, then (A) will have 100% weightage (50 Marks).

the Continuous Internal Assessment (Weekly Assessment, each of 25 marks) of the students in each laboratory session. The average of all the marks obtained across the sessions will be the Final CIA marks.

An Autonomous Institution MANGALURU

MANAGEMENT

II. In Laboratory Courses where (C) is not a component of the assessment pattern, then (A) will have 50% weightage (25 Marks), and (B) will have 50% weightage (25 Marks).

Assessment Mode: The marks will be awarded based on the Continuous Internal Assessment (Weekly Assessment) (A) and One Laboratory Test (B).

- In Weekly Assessment, the student will be evaluated in each laboratory session for 25 marks. The average marks obtained across all the experiments will be the marks obtained for (A).
- A Laboratory Test, similar to the SEE exam is conducted towards the end of the Semester/Course, whichever is earlier. The obtained marks are scaled down to 25 Marks (B)

The Sum of marks obtained across (A) and (B) will be the Final CIA marks.

- III. In Laboratory Courses where (C) is a component of the assessment pattern, then assessment will be done by considering the weightages given above, i.e. (A) 25 Marks (Weekly Assessment), (B) 15 Marks (Laboratory Examination), (C) 10 marks (Open Ended Experiments/Mini Projects)
 - The respective course instructor will design the assessment criteria for the said assessment components.
 - The assessment components will be made known to the students by the respective Course Coordinators prior to the commencement of the Laboratory Work.

In all the cases, the assessments will be done based on the criteria designed by the Course Coordinator.

SEE QUESTION PAPER PATTERN:

- 1. All laboratory experiments should be included for practical examination, from which students are allowed to pick one experiment from the lot.
- 2. SEE shall be conducted for 100 Marks and the marks will be scaled down to 50.
- 3. General Marks Distribution: Procedure + Conduction + Viva = 20% + 50% + 30%.
- 4. Change of experiment is allowed only once and 20% of the marks allotted to the Procedure will be made ZERO (if a question carries two experiments, both should be changed). The evaluation will be done for 80% of the total maximum marks.

- In Weekly Assessment, the student will be evaluated in each laboratory session for 25 marks. The average marks obtained across all the experiments will be the marks obtained for (A).
- A Laboratory Test, similar to the SEE exam is conducted towards the end of the Semester/Course, whichever is earlier. The obtained marks are scaled down to 25 Marks (B)

The Sum of marks obtained across (A) and (B) will be the Final CIA marks.

- III. In Laboratory Courses where (C) is a component of the assessment pattern, then assessment will be done by considering the weightages given above, i.e. (A) 25 Marks (Weekly Assessment), (B) 15 Marks (Laboratory Examination), (C) 10 marks (Open Ended Experiments/Mini Projects)
 - The respective course instructor will design the assessment criteria for the said assessment components.
 - The assessment components will be made known to the students by the respective Course Coordinators prior to the commencement of the Laboratory Work.
- In all the cases, the assessments will be done based on the criteria designed by the Course Coordinator.

SEE QUESTION PAPER PATTERN:

- 1. All laboratory experiments should be included for practical examination, from which students are allowed to pick one experiment from the lot.
- 2. SEE shall be conducted for 100 Marks and the marks will be scaled down to 50.
- 3. General Marks Distribution: Procedure + Conduction + Viva = 20% + 50% + 30%.
- 4. Change of experiment is allowed only once and 20% of the marks allotted to the Procedure will be made ZERO (if a question carries two experiments, both should be changed). The evaluation will be done for 80% of the total maximum marks.

ASSESSMENT STRATEGY

2: Moderate (Medium)

1

1: Poor (Low)

Assessment will be both CIA and SEE. Students learning will be assessed using Direct and Indirect methods:

2

| Sl. No. | Assessment Description | Weightage (%) | Max. Marks |
|------------|---|---------------|------------|
| 1 | Continuous Internal Assessment (CIA) | 100 % | 50 |
| | Laboratory Work (A) | 50 % | 25 |
| | Laboratory Test (B) | 30 % | 15 |
| | Open Ended Experiments /Mini Projects (C) | 20 % | 10 |
| 2 | Semester End Examination (SEE) | 100 % | 50 |

ASSESSMENT STRATEGY:

3

CO5

3

2

3: Substantial (High)

I. In Laboratory Courses where (B) and (C) are not the components of the assessment pattern, then (A) will have 100% weightage (50 Marks).

Assessment Mode: Weekly Assessment of Laboratory Work (50 Marks) - the marks will be awarded based on the Continuous Internal Assessment (Weekly Assessment, each of 25 marks) of the students in each laboratory session. The average of all the marks obtained across the sessions will be the Final CIA marks.

II. In Laboratory Courses where (C) is not a component of the assessment pattern, then (A) will have 50% weightage (25 Marks), and (B) will have 50% weightage (25 Marks).

Assessment Mode: The marks will be awarded based on the Continuous Internal Assessment (Weekly Assessment) (A) and One Laboratory Test (B).

- In Weekly Assessment, the student will be evaluated in each laboratory session for 25 marks. The average marks obtained across all the experiments will be the marks obtained for (A).
- A Laboratory Test, similar to the SEE exam is conducted towards the end of the Semester/Course, whichever is earlier. The obtained marks are scaled down to 25 Marks (B)

The Sum of marks obtained across (A) and (B) will be the Final CIA marks.

- III. In Laboratory Courses where (C) is a component of the assessment pattern, then assessment will be done by considering the weightages given above, i.e. (A) 25 Marks (Weekly Assessment), (B) 15 Marks (Laboratory Examination), (C) 10 marks (Open Ended Experiments/Mini Projects)
 - The respective course instructor will design the assessment criteria for the said assessment components.
 - The assessment components will be made known to the students by the respective Course Coordinators prior to the commencement of the Laboratory Work.

An Autonomous Institution MANGALURU

EERING & MANAGEMENT

In all the cases, the assessments will be done based on the criteria designed by the Course Coordinator.

SEE QUESTION PAPER PATTERN:

- 1. All laboratory experiments should be included for practical examination, from which students are allowed to pick one experiment from the lot.
- 2. SEE shall be conducted for 100 Marks and the marks will be scaled down to 50.
- 3. General Marks Distribution: Procedure + Conduction + Viva = 20% + 50% + 30%.
- 4. Change of experiment is allowed only once and 20% of the marks allotted to the Procedure will be made ZERO (if a question carries two experiments, both should be changed). The evaluation will be done for 80% of the total maximum marks.

| COURSE PREREQUISITES:Fundamentals of software Development activities | ties, Management | functions. | |
| COUDSE OB IECTIVES. | | | |

COURSE OBJECTIVES:

- Outline software engineering principles and activities involved in building large software programs.
- Identify ethical and professional issues and explain why they are of concern to Software Engineers.
- Describe the process of requirement gathering, requirement classification, requirement specification and requirements validation.
- Infer the fundamentals of object-oriented concepts, differentiate system models, use UML diagrams and apply design patterns.
- Explain the importance of Agile Software Development.
- Discuss various types of software testing practices and software evolution processes.
- Recognize the importance Project Management with its methods and methodologies.
- Identify software quality parameters and quantify software using measurements and metrics. List software quality standards and outline the practices involved

TEACHING - LEARNING STRATEGY:

Following are some sample strategies that can be incorporate for the Course Delivery

- Chalk and Talk Method/Blended Mode Method
- Power Point Presentation
- Expert Talk/Webinar/Seminar
- Video Streaming/Self-Study/Simulations
- Peer-to-Peer Activities
- Activity/Problem Based Learning
- Case Studies
- MOOC/NPTEL Courses
- Any other innovative initiatives with respect to the Course contents

COURSE CONTENTS

MODULE - I

| Introduction : The evolving role of software, The changing nature of software, Software engineering, A Process Framework, Process Patterns, Process Assessment, Personal and Team Process Models, Process Technology, Product and Process. | 8 Hours |
|---|---------|
| Process Models : Prescriptive models, Waterfall model, Incremental process models, | |
| Evolutionary process models, Specialized process models. | |
| Requirements Engineering : Requirements Engineering Task, Initiating the Requirement | |
| Engineering process, Eliciting Requirements, developing use cases, Building the analysis model, Negotiating Requirements, Validating Requirements, Software Requirement Document (Sec 4.2). | |

MODIUE тт

1

| | MODULE - II | |
|--|---|----------------------------------|
| develo Model and Cl model, Buildin Concept | Auction, Modelling Concepts and Class Modelling: What is Object orientation? What is OO-pment? OO Themes; Evidence for usefulness of OO development; OO modelling history. Ing as Design technique: Modelling, abstraction, The Three models. Class Modelling: Object ass Concept, Link and associations concepts, Generalization and Inheritance, A sample class Navigation of class models, and UML diagrams g the Analysis Models: Requirement Analysis, Analysis Model Approaches, Data modeling s, Object Oriented Analysis, Scenario-Based Modeling, Flow-Oriented Modeling, class Based ag, Creating a Behavioral Model. | |
| | MODULE - III | |
| Conver Testing | are Testing : A Strategic Approach to Software Testing, Strategic Issues, Test Strategies for ntional Software, Test Strategies for Object -Oriented Software, Validation Testing, System g, The Art of Debugging. Methodology : Before Agile – Waterfall, Agile Development. | |
| | MODULE - IV | |
| Manag Metho Object | Auction to Project Management : Introduction, Project and Importance of Project gement, Contract Management, Activities Covered by Software Project Management, Plans, ds and Methodologies, some ways of categorizing Software Projects, Stakeholders, Setting ives, Business Case, Project Success and Failure, Management and Management Control, t Management life cycle, Traditional versus Modern Project Management Practices. | 8 Hours |
| | MODULE - V | |
| and S critical Softwa softwa | ty Planning : Objectives of Activity Planning, When to Plan, Project Schedules, Sequencing cheduling Activities, Network Planning Models, Forward Pass– Backward Pass, identifying path, Activity Float, Shortening Project Duration, Activity on Arrow Networks. are Quality : Introduction, the place of software quality in project planning, Importance of re quality, software quality models, ISO 9126, quality management systems, process capability s, techniques to enhance software quality, quality plans. | 8 Hours |
| | COURSE OUTCOMES | |
| Upon c | completion of this course, the students will be able to: | |
| CO No. | Course Outcome Description | Bloom's Taxono my Level |
| CO1 | Understand the activities involved in software engineering and analyse the role of various process models | CL2 |
| CO2 | Explain the basics of object-oriented concepts and build a suitable class model using modelling techniques | CL2 |
| CO3 | Interpret various software testing methods and to understand the importance of agile methodology. | CL2 |
| CO4 | Apply the Concepts of project planning and quality management in software development | CL3 |
| CO5 | Illustrate the importance of activity planning and its models | CL2 |

| Decode | te Translation : Language Divergences and Typology, Machine Translation using r, Details of the Encoder-Decoder Model, Translating in low-resource situations, MT E d Ethical Issues. | | 0 |
| | COURSE OUTCOMES | | |
| Upon co | mpletion of this course, the students will be able to: | | |
| CO No. | Course Outcome Description | | Bloom's Taxonomy Level |
| CO1 | Discuss the concepts of NLP and demonstrate the statistical-based language mode smoothing techniques | | CL3 |
| CO2 | Demonstrate the use of morphological analysis and parsing using Finite State Transd spelling error detection and correction, parts of speech tagging, context-free gramma different parsing approaches. | | CL3 |
| CO3 | Apply the Naïve Bayes classifier and sentiment analysis for Natural language pro and text classifications. | | CL3 |
| CO4 | Illustrate the use of Information Retrieval in the context of NLP and understar concept of lexical semantics, lexical dictionaries such as WordNet, lexical computa semantics, distributional word similarity. | | CL3 |
| CO5 | Develop the Machine Translation applications using Encoder and Decoder model. | | CL3 |
| | LABORATORY COMPONENTS | | |
| Exp. No. | Experiment Description | CO No. | Bloom's Taxonomy Level |
| 1 | Consider the following Corpus of three sentencesa) There is a big garden.b) Children play in a garden | | CL3 |
| 1 | c) They play inside beautiful garden Calculate P for the sentence "They play in a big Garden" assuming a bi-gram language model. | | CL5 |
| 2 | Find the bigram count for the given corpus. Apply Laplace smoothing and find the bigram probabilities after add-one smoothing (up to 4 decimal places) | | CL3 |
| 3 | Implement rule-based tagger and stochastic tagger for the give corpus of sentences. | | CL3 |
| 4 | Implement top-down and bottom-up parsing using python NLTK. | | CL3 |
| 5 | Given the following short movie reviews, each labeled with a genre, either comedy or action: a) fun, couple, love, love : comedy b) fast, furious, shoot : action c) couple, fly, fast, fun, fun :comedy d) furious, shoot, shoot, fun :action e) fly, fast, shoot, love :action and a new document D: <i>fast, couple, shoot, fly</i> compute the most likely class for D. Assume a naive Bayes classifier and use add-1 smoothing for the likelihoods. | | CL3 |
| 6 | The dataset contains following 5 documents. D1: "Shipment of gold damaged in a fire" D2: "Delivery of silver arrived in a silver truck" D3: "Shipment of gold arrived in a truck" D4: "Purchased silver and gold arrived in a wooden truck" | | CL3 |

|----|----|----|

NOTE:

- Assessment will be both CIA and SEE.
- The practical sessions of the IPCC shall be for CIE only.
- The Theory component of the IPCC shall be for both CIA and SEE respectively.
- The questions from the practical sessions shall be included in Theory SEE.

Note: For Examinations (both CIE and SEE), the question papers shall contain the questions mapped to the appropriate Bloom's Level. Any COs mapped with higher cognitive Bloom's Level may also be assessed through the assignments.

SEE QUESTION PAPER PATTERN:

- 1. The question paper will have TEN full questions from FIVE Modules
- 2. There will be 2 full questions from each module. Every question will carry a maximum of 20 marks.
- 3. Each full question may have a maximum of four sub-questions covering all the topics under a module.
- 4. The students will have to answer FIVE full questions, selecting one full question from each module.

TEXT BOOKS:

- 1. Tanveer Siddiqui, U.S. Tiwary, "Natural Language Processing and Information Retrieval", Oxford University Press, 2008.
- 2. D. Jurafsky, J. H. Martin, "Speech and Language Processing, An Introduction to Natural Language Processing, Computational Linguistics, and Speech Recognition (3e)", Pearson Education, 2023.
- 3. Akshay Kulkarni, Adarsha Shivananda, "Natural Language Processing Recipes Unlocking Text Data with Machine Learning and Deep Learning using Python", Apress, 2019
- 4. James Allen, "Natural Language Understanding", 2nd edition, Benjamin/Cummings publishing company, 1995.
- 5. Gerald J. Kowalski and Mark.T. Maybury, "Information Storage and Retrieval systems", Kluwer Academic Publishers, 2000

SEE QUESTION PAPER PATTERN:

- The question paper will have **TEN** full questions from **FIVE** Modules
- There will be 2 full questions from each module. Every question will carry a maximum of 20 marks.
- Each full question may have a maximum of four sub-questions covering all the topics under a module.
- The students will have to answer FIVE full questions, selecting one full question from each module.

COURSE PREREQUISITES:

Linear algebra, probability and statistics, programming skills ,data and database knowledge

COURSE OBJECTIVES:

This course will enable students to:

- Identifies and predicts the hidden or untraceable data.
- Understand the automatic discovery of regularities in data through the use of computer algorithms .
- Explain the recognizable proof of verifiable items and relations.
- Choose the features that allow pattern vectors to belong to different categories.
- Analyze the use of complex algorithms to identify patterns in the input data.

TEACHING - LEARNING STRATEGY:

Following are some sample strategies that can be incorporate for the Course Delivery

- Chalk and Talk Method/Blended Mode Method
- PowerPoint Presentation
- Expert Talk/Webinar/Seminar
- Video Streaming/Self-Study/Simulations
- Peer-to-Peer Activities
- Activity/Problem Based Learning
- Case Studies
- MOOC/NPTEL Courses
- Any other innovative initiatives with respect to the Course contents

COURSE CONTENTS

| MODULE – I | |
|---|---------|
| Statistical Pattern Recognition: Introduction to Statistical Pattern Recognition, The Gaussian Case and Class Dependence, Discriminant Functions, Classifier Performance, Risk, and Errors. | 8 Hours |
| MODULE – II | |
| Supervised Learning Using Parametric and Nonparametric Approaches: Parametric Estimation and Supervised Learning, Maximum Likelihood Estimation, Bayesian Parameter Estimation Approach, Parzen Windows. Linear Discriminant Functions: Linear Discriminant Functions and Decision Surfaces, Generalized Linear Discriminant Functions, Linearly Separable Case, Minimizing the Perceptron Criterion Function, Relaxation Procedures, Minimum Square Error Procedures, Linear Programming Algorithms, Support Vector Machines. | 8 Hours |

| | | | | | | Μ | IODUL | | GALURU | | | | | | |

SOCIAL NETWORK ANALYSIS

An Autonomous Institution MANGALURU

& MANAGEMENT

(Effective from the Academic Year 2023 - 2024)

VI SEMESTER

| VI SEMESTER | | | | | | | |
|---|--------------------|------------|----|--|--|--|--|
| Course Code | 21CS643 | CIA Marks | 50 | | | | |
| Number of Contact Hours/Week (L: T: P: S) | 3:0:0:0 | SEE Marks | 50 | | | | |
| Total Hours of Pedagogy | 40L | Exam Hours | 03 | | | | |
| | CREDITS – 3 | | | | | | |

COURSE PREREQUISITES:

• Fundamental knowledge of Mathematics, Data Structures and algorithms. COURSE OBJECTIVES:

- To understand the science of networks, including the principles of graph theory and key statistical properties of network.
- To acquire a working knowledge of descriptive network analysis techniques.
- Gain proficiency in evaluating network structure through the analysis of nodes and edges, calculating network diameter, and determining average path length To visualize social networks.
- Study the dynamics of information and influence propagation on networks, including the basic cascade model and strategies for influence maximization.

TEACHING - LEARNING STRATEGY:

Following are some sample strategies that can be incorporate for the Course Delivery

- Chalk and Talk Method/Blended Mode Method
- Power Point Presentation
- Expert Talk/Webinar/Seminar
- Video Streaming/Self-Study/Simulations
- Peer-to-Peer Activities
- Activity/Problem Based Learning
- Case Studies
- MOOC/NPTEL Courses
- Any other innovative initiatives with respect to the Course contents

| COURSE CONTENTS | | | | |
|---|---------|--|--|--|
| MODULE - I | | | | |
| Introduction to social network analysis and Descriptive network analysis: Introduction to new science | 8 Hours | | | |
| of networks. Networks examples. Graph theory basics. Statistical network properties. Degree distribution, | | | | |
| clustering coefficient. Frequent patterns. Network motifs. Cliques and k-cores. | | | | |
| MODULE - II | | | | |
| Network structure, Node centralities and ranking on network: Nodes and edges, network diameter and | 8 Hours | | | |
| average path length. Node centrality metrics: degree, closeness and betweenness centrality. Eigenvector | | | | |
| centrality and PageRank. Algorithm HITS. | | | | |
| MODULE - III | | | | |
| Network communities and Affiliation networks: Networks communities. Graph partitioning and cut | 8 Hours | | | |
| metrics. Edge betweenness. Modularity clustering. Affiliation network and bipartite graphs. 1-mode | | | | |
| projections. Recommendation systems. | | | | |

MODULE - IV Information and influence propagation on networks and Network visualization: Social Diffusion. 8 Hours Basic cascade model. Influence maximization. Most influential nodes in network. Network visualization and graph layouts. Graph sampling. Low -dimensional projections. **MODULE - V** Social media mining and SNA in real world: FB/VK and Twitter analysis: Natural language processing 8 Hours and sentiment mining. Properties of large social networks: friends, connections, likes, re-tweets. **COURSE OUTCOMES** Upon completion of this course, the students will be able to: Bloom's CO **Course Outcome Description** Taxonomy No. Level Demonstrate proficiency in applying the principles of the new science of networks, CL2 CO1 exemplifying their understanding through the identification and analysis of network structures. Evaluate and apply advanced concepts in social network analysis, for comprehensive CL3 CO₂ understanding of network structures and node centrality metrics. CL3 Analyze and differentiate various network community detection techniques. CO3 Analyze network structures by identifying and justifying the significance of the most influential CL3 CO4 nodes and show proficiency in using network visualization tools. Evaluate and apply advanced techniques, including natural language processing and sentiment CL3 CO5 mining, to analyze Facebook, VK, and Twitter data. **CO-PO-PSO MAPPING** Programme Specific CO **Programme Outcomes (PO)** No. **Outcome (PSO)** 1 2 3 4 5 6 7 8 9 10 11 12 1 2 CO1 3 2 2 2 2 3 2 1 3 3 2 2 2 2 **CO2** 2 **CO3** 3 3 3 2 2 2 2 3 3 2 2 2 **CO4** 3 2 3 3 3 2 2 2 **CO5** 2 3: Substantial (High) 2: Moderate (Medium) 1: Poor (Low) ASSESSMENT STRATEGY Assessment will be both CIA and SEE. - The question paper will have **TEN** full questions from **FIVE** Modules
- There will be 2 full questions from each module. Every question will carry a maximum of 20 marks.
- Each full question may have a maximum of four sub-questions covering all the topics under a module.
- The students will have to answer FIVE full questions, selecting one full question from each module.

MANGALURU

BLOCKCHAIN & APPLICATIONS

| (Effective from the Academic Year 2023 - 2024) | |
|--|--|
| | |

| VI SEMESTER | | | | | | | | | |
|---|--------------------|------------|----|--|--|--|--|--|--|
| Course Code: | 21CS651 | CIA Marks | 50 | | | | | | |
| Number of Contact Hours/Week (L: T: P: S) | 3:0:0:0 | SEE Marks | 50 | | | | | | |
| Total Hours of Pedagogy | 40L | Exam Hours | 03 | | | | | | |
| | CREDITS – 3 | | | | | | | | |

COURSE PREREQUISITES:

• Fundamental knowledge of Mathematics, Data Structures, Networking

COURSE OBJECTIVES:

- Define and Explain the fundamentals of Block chain
- Illustrate the technologies of Block chain
- Describe the models of Block chain
- Analyze and demonstrate the Ethereum

TEACHING - LEARNING STRATEGY:

Following are some sample strategies that can be incorporate for the Course Delivery

- Chalk and Talk Method/Blended Mode Method
- Power Point Presentation
- Expert Talk/Webinar/Seminar
- Video Streaming/Self-Study/Simulations
- Peer-to-Peer Activities
- Activity/Problem Based Learning
- Case Studies
- MOOC/NPTEL Courses
- Any other innovative initiatives with respect to the Course contents

COURSE CONTENTS

MODULE - I

Introduction to Blockchain Technology: Distributed systems, The history of blockchain, CAP theorem
and blockchain, Benefits and limitations of blockchain, Decentralization using blockchain, Methods of
decentralization, Routes to decentralization.8 Hours

MODULE - II

Cryptography in Blockchain: Introduction, cryptographic primitives, Asymmetric cryptography, public **8 Hours** and private keys ,RSA, ECC , Hashfucntions, financial markets and trading.

MODULE - III

Bit Coin Introduction, Transactions: Structure, Transactions types, The structure of a block, The genesis block , The bitcoin network, Wallets and its types, Bitcoin payments, Bitcoin investment and buying and selling bitcoins, Bitcoin installation, Bitcoin programming and the command-line interface, Bitcoin improvement proposals (BIPs).

MODULE - IV

| Ethereum: Ethereum block chain, Etherium network, Components of the Ethereum ecosystem, Keys and | 8 Hours |
|---|---------|
| Addresses, Accounts and its types, Transactions and Messages, Contract Creation transaction, Message call | |
| transaction, messages, Calls, Transaction Validation and execution, Transaction substrate, State storage in | |
| the Ethereum blockchain, Ether cryptocurrency / tokens (ETC and ETH), The Ethereum Virtual Machine | |
| (EVM), Execution environment, Native contracts. | |
| | |

MODULE - V

| Smart Contract and Hyper ledger: Ricardian contracts, Application developed on Etherium : The DAO. | 8 Hours |
|--|---------|
| Hyper ledger: Hyper ledger projects, Hyperledger as a protocol, The reference architecture, Requirements | |
| and design goals of Hyperledger Fabric, Applications on blockchain on fabric, Consensus in Hyperledger | |
| Fabric, The transaction life cycle in Hyperledger Fabric, Sawtooth lake, Corda Architecture. | |

| CREDITS – 3 | | | | | | | | | |

COURSE PREREQUISITES:

• Fundamental knowledge of computer networks.

COURSE OBJECTIVES:

- Provide students with the fundamentals and essentials of Cloud Computing.
- To provide students a sound foundation of Cloud Computing so that they are able to start using and adopting Cloud Computing services and tools in their real life scenarios.
- To enable students exploring some important cloud computing driven commercial systems and applications.
- To expose the students to frontier areas of Cloud Computing and information systems, while providing sufficient foundations to enable further study and research.

TEACHING - LEARNING STRATEGY:

Following are some sample strategies that can be incorporate for the Course Delivery

- Chalk and Talk Method/Blended Mode Method
- Power Point Presentation
- Expert Talk/Webinar/Seminar
- Video Streaming/Self-Study/Simulations
- Peer-to-Peer Activities
- Activity/Problem Based Learning
- Case Studies
- MOOC/NPTEL Courses
- Any other innovative initiatives with respect to the Course contents

Note: The assignments mentioned above may be provided appropriately to the students belonging to different bands **SEE QUESTION PAPER PATTERN:**

- The question paper will have **TEN** full questions from **FIVE** Modules
 - There will be 2 full questions from each module. Every question will carry a maximum of 20 marks.
 - Each full question may have a maximum of four sub-questions covering all the topics under a module.
 - The students will have to answer FIVE full questions, selecting one full question from each module.

| CREDITS – 3 | | | | | | | | |

COURSE PREREQUISITES:

• Fundamental of DBMS

COURSE OBJECTIVES:

- Recognize and describe the four types of NoSQL Databases, the Document-oriented, Key-Value Pairs, Columnoriented and Graph databases useful for diverse applications.
- Apply performance tuning on Column-oriented NoSQL databases and Document-oriented NoSQL Databases.
- Differentiate the detailed architecture of column-oriented NoSQL database, Document database and Graph Database and relate usage of processor, memory, storage and file system commands.
- Evaluate several applications for location-based service and recommendation services. Devise an application using the components of NoSQL.

TEACHING - LEARNING STRATEGY:

Following are some sample strategies that can be incorporate for the Course Delivery

- Chalk and Talk Method/Blended Mode Method
- Power Point Presentation
- Expert Talk/Webinar/Seminar
- Video Streaming/Self-Study/Simulations
- Peer-to-Peer Activities
- Activity/Problem Based Learning
- Case Studies
- MOOC/NPTEL Courses
- Any other innovative initiatives with respect to the Course contents

| COURSE CONTENTS | | | | | | |
|--|---------|--|--|--|--|--|
| MODULE - I | | | | | | |
| Importance of NoSQL: The Value of Relational Databases, Getting at Persistent Data, Concurrency, | 8 Hours | | | | | |
| Integration, A Standard Model, Impedance Mismatch, Application and Integration Databases, Attack of the | | | | | | |
| Clusters, The Emergence of NoSQL, | | | | | | |
| Aggregate Data Models; Aggregates, Example of Relations and Aggregates, Consequences of Aggregate | | | | | | |
| Orientation, Key-Value and Document Data Models, Column-Family Stores, Summarizing Aggregate- | | | | | | |
| Oriented Databases. | | | | | | |
| More Details on Data Models; Relationships, Graph Databases, Schema less Databases, Materialized | | | | | | |
| Views, Modeling for Data Access. | | | | | | |
| MODULE - II | | | | | | |
| Distribution Models; Single Server, Sharding, Master-Slave Replication, Peer-to-Peer Replication, | 8 Hours | | | | | |
| Combining Sharding and Replication. Consistency, Update Consistency, Read Consistency, Relaxing | | | | | | |
| Consistency, The CAP Theorem, Relaxing Durability, Quorums. Version Stamps, Business and System | | | | | | |
| Transactions, Version Stamps on Multiple Nodes. | | | | | | |
| Case Study: Distribution models and Version stamps. | | | | | | |
| MODULE - III | | | | | | |
| Key-Value Databases, Introduction to Key-Value Store, Key-Value Store Features, Consistency, | 8 Hours | | | | | |
| Transactions, Query Features, Structure of Data, Scaling, Suitable Use Cases, Storing Session Information, | | | | | | |
| User Profiles, Preference, Shopping Cart Data, constraints of Key value store, Relationships among Data, | | | | | | |
| Multioperation Transactions, Query by Data, Operations by Sets. Case Study on Key Value Databases. | | | | | | |

| CREDITS – 3 | | | | | | | | | | |

Prerequisites:

- Knowledge about computer networks
- Moderate knowledge on working of sensors and actuators

Course Objectives:

This course will enable students to:

- Interpret the impact and challenges posed by IoT networks leading to new architectural models.
- Compare and contrast the deployment of smart objects and the technologies to connect them to the network.
- Appraise the role of IoT protocols for efficient network communication.
- Elaborate the need for Data Analytics and Security in IoT.
- Illustrate different sensor technologies for sensing real world entities and identify the applications of IoT in the Industry

Teaching-Learning Strategy:

These are some sample strategies, which course faculty members can incorporate into the Teaching-Learning Process:

- Chalk and Talk Method/Blended Mode Method
- PowerPoint Presentation
- Expert Talk/Webinar/Seminar
- Video Streaming/Self-Study/Simulations
- Peer-to-Peer Activities
- Activity/Problem-Based Learning
- Case Studies
- MOOC/NPTEL Courses

COURSE CONTENTS

MODULE - 1

| Module Contents | | | | | | |
|--|---------|--|--|--|--|--|
| Introduction to IoT , Genesis, Digitization and Impact, Convergence of IT and IoT, IoT Challenges, IoT Network Architecture and Design, Drivers Behind New Network Architectures, Comparing IoT Architectures, A Simplified IoT Architecture, The Core IoT Functional Stack, IoT Data Management and Compute Stack. | 8 Hours | | | | | |
| MODULE - 2 | | | | | | |

| Smart Objects: The "Things" in IoT, Sensors, Actuators, Smart Objects, Sensor Networks, Connecting SHours Smart Objects: Communications Criteria, IoT Access Technologies. MODULE - 3 8 Hours P as the IoT Network Layer, The Business Case for IP, The need for Optimization. Optimizing IP for IoT, Profiles and Compliances, Application Protocols for IoT, The Transport Layer, IoT Application Transport Methods. 8 Hours MODULE - 4 Data and Analytics for IoT, An Introduction to Data Analytics for IoT, Machine Learning, Big Data Analytics Tools and Technology. Edge Streaming Analytics, Security Practices and Systems Vary, Formal Risk Analysis Structures: OCTAVE and FAR. 8 Hours MODULE - 4 Data and Analytics for IoT, An Introduction to Data Analytics For IoT, Machine Learning, Big Data Analytics Tools and Technology. Edge Streaming Analytics, Security Practices and Systems Vary, Formal Risk Analysis Structures: OCTAVE and FAR. 8 Hours MODULE - 5 Iot Physical Devices and Endpoints - Arduino UNO: Introduction to Arduino, Arduino UNO, Installing the Software, Fundamentals of Arduino Programming. IoT Physical Devices and Endpoints - RapherryPi: Normal Risk Analysis Structures: OCTAVE and Parket Structure. 8 Hours Structure from DS18B20 temperature Sensor, Connecting RaspherryPi ivits System Using Pi, DS18B20 temperature Sensor, Connecting RaspherryPi. ENGINEERING & MANAGEMENT

An Autonomous Institution

SEE Question Paper Pattern:

- The question paper will have **TEN** full questions.
- Each full question consists of 20 marks.
- There will be 2 full questions from all the FIVE modules.
- Each full question will have a maximum of four sub-questions covering all the topics under a module.
- The students will have to answer 5 full questions, selecting one full question from each module.

Text Books:

- David Hanes, Gonzalo Salgueiro, Patrick Grossetete, Robert Barton, Jerome Henry, "IoT Fundamentals: Networking Technologies, Protocols, and Use Cases for the Internet of Things", 1 st edition, Pearson Education (Cisco Press Indian Reprint). (ISBN: 978-9386873743)
- 2. Srinivasa K G, "Internet of Things", CENGAGE Leaning India, 2017.
- Vijay Madisetti and ArshdeepBahga, "Internet of Things (A Hands-on-Approach)", 1st edition, VPT, 2014. (ISBN: 978-8173719547)

| CREDITS – 1 | | | | | | | | | |

COURSE PREREQUISITES:

- Fundamental knowledge of statistics, probability, artificial intelligence and Python/Java programming.
- The algorithms can be written in Python/Java programming languages.

COURSE OBJECTIVES:

- To understand the basic concepts and techniques of Machine Learning through python programming.
- To develop skills of using recent Machine Learning packages for solving practical problems.
- To gain experience of doing independent study and research.

TEACHING - LEARNING STRATEGY:

Following are some sample strategies that can be incorporate for the Course Delivery

- Chalk and Talk Method/Blended Mode Method •
- **Power Point Presentation**
- Expert Talk/Webinar/Seminar •
- Video Streaming/Self-Study/Simulations •
- Peer-to-Peer Activities •
- Activity/Problem Based Learning •
- **Case Studies** •
- MOOC/NPTEL Courses ٠
- Any other innovative initiatives with respect to the Course contents

LIST OF EXPERIMENTS

| Exp. No. | Experiment Description | CO No. | Bloom's Taxonomy Level | | | | | |
|-------------|---|-----------|------------------------------|--|--|--|--|--|
| 1. | Implement and demonstrate the Find-S algorithm for finding the most specific hypothesis. | CO1 | CL3 | | | | | |
| 2. | Implement and demonstrate the Candidate Elimination algorithm using a data set stored as a .CSV file. | CO1 | CL3 | | | | | |
| 3. | Demonstrate data Preprocessing (Data Cleaning, Integration and Transformation) operations on a suitable data. | CO2 | CL3 | | | | | |
| 4. | Demonstrate the working of SVM classifier for a suitable dataset. | CO3 | CL3 | | | | | |
| 5. | Implement and demonstrate the working of the Decision Tree algorithm. | CO3 | CL3 | | | | | |
| 6. | Implement Random Forest classifier using python programming. | CO3 | CL3 | | | | | |
| 7. | Demonstrate the text classifier using Naive Bayes classifier algorithm. | CO4 | CL3 | | | | | |
| 8. | Implement the Naive Bayesian classifier for a sample training data set stored as a .CSV file. | CO4 | CL3 | | | | | |
| 9. | Construct a Bayesian network to analyze the diagnosis of heart patients using heart diseases dataset. | CO4 | CL4 | | | | | |
| 10. | Implement KNN classification algorithm with an appropriate dataset and analyze the results. | CO5 | CL4 | | | | | |

ASSESSMENT STRATEGY:

I. In Laboratory Courses where (B) and (C) are not the components of the assessment pattern, then (A) will have 100% weightage (50 Marks).

Assessment Mode: Weekly Assessment of Laboratory Work (50 Marks) - the marks will be awarded based on the Continuous Internal Assessment (Weekly Assessment, each of 25 marks) of the students in each laboratory session. The average of all the marks obtained across the sessions will be the Final CIA marks.

II. In Laboratory Courses where (C) is not a component of the assessment pattern, then (A) will have 50% weightage (25 Marks), and (B) will have 50% weightage (25 Marks).

Assessment Mode: The marks will be awarded based on the Continuous Internal Assessment (Weekly Assessment) (A) and One Laboratory Test (B).

- In Weekly Assessment, the student will be evaluated in each laboratory session for 25 marks. The average marks obtained across all the experiments will be the marks obtained for (A).
- A Laboratory Test, similar to the SEE exam is conducted towards the end of the Semester/Course, whichever is earlier. The obtained marks are scaled down to 25 Marks (B)

The Sum of marks obtained across (A) and (B) will be the Final CIA marks.

III. In Laboratory Courses where (C) is a component of the assessment pattern, then assessment will be done by considering the weightages given above, i.e. (A) - 25 Marks (Weekly Assessment), (B) - 15 Marks (Laboratory Examination), (C) – 10 marks (Open Ended Experiments/Mini Projects)

- COLLEGE OF ENGINEERING & MANAGEMENT An Autonomous Institution MANGALURU
- The respective course instructor will design the assessment criteria for the said assessment components.
- The assessment components will be made known to the students by the respective Course Coordinators prior to the commencement of the Laboratory Work.

In all the cases, the assessments will be done based on the criteria designed by the Course Coordinator.

SEE QUESTION PAPER PATTERN:

- 1. All laboratory experiments should be included for practical examination, from which students are allowed to pick one experiment from the lot.
- 2. SEE shall be conducted for 100 Marks and the marks will be scaled down to 50.
- 3. General Marks Distribution: Procedure + Conduction + Viva = 20% + 50% + 30%.

Change of experiment is allowed only once and 20% of the marks allotted to the Procedure will be made ZERO (if a question carries two experiments, both should be changed). The evaluation will be done for 80% of the total maximum marks.

DIGITAL IMAGE PROCESSING

| (Effective from the Academic Year 2024 - 2025) | | | | | | | | | | |
|--|---------|-----------|----|--|--|--|--|--|--|--|
| VII SEMESTER | | | | | | | | | | |
| Course Code | 21AI71 | CIA Marks | 50 | | | | | | | |
| Number of Contact Hours/Week (L: T: P: S) | 3:0:2:0 | SEE Marks | 50 | | | | | | | |
| Total Hours of Pedagogy40L + 20PExam Hours03 | | | | | | | | | | |
| CREDITS – 4 | | | | | | | | | | |

COURSE PREREQUISITES:

Fundamental knowledge of Image concepts and applications, linear Algebra.

COURSE OBJECTIVES:

- Describe the fundamentals of image processing and computer vision
- Illustrate the image enhancement techniques
- Illustrate Image restoration and image compression technique
- Describe the image segmentation and morphological image processing
- Review computer vision techniques and its applications.

TEACHING - LEARNING STRATEGY:

Following are some sample strategies that can be incorporate for the Course Delivery

- Chalk and Talk Method/Blended Mode Method
- PowerPoint Presentation
- Expert Talk/Webinar/Seminar
- Video Streaming/Self-Study/Simulations
- Peer-to-Peer Activities
- Activity/Problem Based Learning
- Case Studies

- MOOC/NPTEL Courses
- Any other innovative initiatives with respect to the Course contents

| COURSE CONTENTS | |
|--|---------|
| MODULE – I | |
| Digital Image Fundamentals: What is Digital Image Processing? Origins of Digital Image Processing, | 8 Hours |
| Examples of fields that use DIP, Fundamental Steps in Digital Image Processing, Components of an Image | |
| Processing System, Elements of Visual Perception, Image Sensing and Acquisition, Image Sampling and | |
| Quantization, Some Basic Relationships between Pixels, Linear and Nonlinear Operations. | |
| MODULE – II | |
| Spatial Domain: Some Basic Intensity Transformation Functions, Histogram Processing, Fundamentals of | 8 Hours |
| Spatial Filtering, -Smoothing Spatial Filters, Sharpening Spatial Filters | |
| Frequency Domain: Preliminary Concepts, The Discrete Fourier Transform (DFT) of Two Variables, | |
| Properties of the 2-D DET Filtering in the Frequency Domain Image Smoothing and Image Sharpening | |

Properties of the 2-D DFT, Filtering in the Frequency Domain, Image Smoothing and Image Sharpening Using Frequency Domain Filters, and Selective Filtering.

MODULE – III

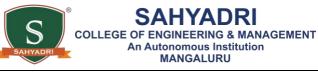

Restoration: Noise models, Restoration in the Presence of Noise Only using Spatial Filtering and 8 Hours Frequency Domain Filtering, Linear, Position-Invariant Degradations, Estimating the Degradation Function, Inverse Filtering, Minimum Mean Square Error (Wiener) Filtering, and Constrained Least Squares Filtering.

MODULE – IV

8 Hours

Wavelets: Background, Multiresolution Expansions.

Morphological Image Processing: Preliminaries, Erosion and Dilation, Opening and Closing, The Hit-or-Miss Transforms, and Some Basic Morphological Algorithms.

| Ι | II | III | | |
| | Syllabus Cover | rage | Syllabus Coverage | Syllabus Coverage |
| 309 | % 40% | 30% | 100% | 100% |
| M | I | | MI | MI |
| MI | II MII | | MII | MII |
| | MIII | | MIII | MIII |
| | | MIV | MIV | MIV |
| | | MV | MV | MV |
| | | | | |

NOTE:

- Assessment will be both CIA and SEE.
- The practical sessions of the IPCC shall be for CIE only.
- The Theory component of the IPCC shall be for both CIA and SEE respectively.
- The questions from the practical sessions shall be included in Theory SEE.

Note: For Examinations (both CIE and SEE), the question papers shall contain the questions mapped to the appropriate Bloom's Level. Any COs mapped with higher cognitive Bloom's Level may also be assessed through the assignments.

SEE QUESTION PAPER PATTERN:

- 1. The question paper will have TEN full questions from FIVE Modules
- 2. There will be 2 full questions from each module. Every question will carry a maximum of 20 marks.
- 3. Each full question may have a maximum of four sub-questions covering all the topics under a module.
- 4. The students will have to answer FIVE full questions, selecting one full question from each module.

SEE Question Paper Pattern:

- The question paper will have **TEN** full questions.
- Each full question consists of 20 marks.
- There will be 2 full questions from all the FIVE modules.
- Each full question will have a maximum of four sub-questions covering all the topics under a module.
- The students will have to answer 5 full questions, selecting one full question from each module.

BUSINESS INTELLIGENCE

| (Effective from the Academic Year 2024 - 2025) VII SEMESTER | | | | | | | |
|--|---------|------------|----|--|--|--|--|
| Course Code | 21AI733 | CIA Marks | 50 | | | | |
| Number of Contact Hours/Week (L: T: P: S) | 3:0:0:0 | SEE Marks | 50 | | | | |
| Total Hours of Pedagogy | 40L | Exam Hours | 03 | | | | |
| CREDITS – 3 | | | | | | | |

COURSE PREREQUISITES:

Database fundamentals, Statistical Concepts, Critical Thinking and Analytical Skills, Basic of Microsoft Excel.

COURSE OBJECTIVES:

This course will enable students to:

- Extract meaningful insights from diverse data sources.
- Contribute to strategic decision-making processes.
- Explore the responsible use of data, privacy concerns, and the ethical considerations associated with BI applications.

TEACHING - LEARNING STRATEGY:

Following are some sample strategies that can be incorporate for the Course Delivery

- Chalk and Talk Method/Blended Mode Method
- PowerPoint Presentation
- Expert Talk/Webinar/Seminar
- Video Streaming/Self-Study/Simulations
- Peer-to-Peer Activities
- Activity/Problem Based Learning
- Case Studies
- MOOC/NPTEL Courses
- Any other innovative initiatives with respect to the Course contents

COURSE CONTENTS

MODULE – I

| 8 Hours |
|---------|
| |
| |
| |
| |
| |

MODULE – II

Managing The BI Project: Defining And Planning The BI Project, Project Planning Activities, Roles And
Risks Involved In These Activities, General Business Requirement, Project Specific Requirements,
Interviewing Process.8 Hours

MODULE – III

Differences in Database Design Philosophies:Logical Database Design, Physical Database Design,8 HoursActivities, Roles And Risks Involved In These Activities, Incremental Rollout, Security Management,8 HoursDatabase Backup And Recovery.8

MODULE-IV

Growth Management: Application Release Concept, Post Implementation Reviews, Release Evaluation Activities, The Information Asset and Data Valuation, Actionable Knowledge – ROI, BI Applications, The Intelligence Dashboard.

MODULE – V

Business View of Information technology Applications: Business Enterprise excellence, Key purpose of
using IT, Type of digital data, basics of enterprise reporting, BI road ahead.8 Hours

DATA SCIENCE AND BIG DATA ANALYTICS

| (Effective | e from the A | Academic Year | 2024 - | 2025) |
|------------|--------------|---------------|--------|-------|
| | | | | |

VII SEMESTER

| | VII SENIESIEF | N | | | | |
|---|---------------|------------|----|--|--|--|
| Course Code | 21AI734 | CIA Marks | 50 | | | |
| Number of Contact Hours/Week (L: T: P: S) | 3:0:2:0 | SEE Marks | 50 | | | |
| Total Hours of Pedagogy | 40L + 20P | Exam Hours | 03 | | | |
| CREDITS – 4 | | | | | | |

COURSE PREREQUISITES:

• Fundamental knowledge of mathematical concepts, analytical skills and programming.

COURSE OBJECTIVES:

- Demonstrate the proficiency with statistical analysis of data to derive insight from results and interpret the data findings visually
- Utilize the skills in data management by obtaining, cleaning and transforming the data
- Understand fundamentals and applications of Big Data analytics and various machine learning algorithms for Big Data Analytics
- Explore the Hadoop framework, Hadoop Distributed File system and employ MapReduce programming model to process the big data
- Explore the SPARK data model and SPARK Programming Model

TEACHING - LEARNING STRATEGY:

Following are some sample strategies that can be incorporate for the Course Delivery

- Chalk and Talk Method/Blended Mode Method
- Power Point Presentation
- Expert Talk/Webinar/Seminar
- Video Streaming/Self-Study/Simulations
- Peer-to-Peer Activities
- Activity/Problem Based Learning
- Case Studies
- MOOC/NPTEL Courses
- Any other innovative initiatives with respect to the Course contents

MODULE - I

| Data Science Fundamentals: Introduction to Data science. Visualizing Data: matplotlib, Bar Charts, Line Charts, Scatterplots, Linear Algebra: Vectors, Matrices, Statistics: Describing a Single Set of Data, Correlation, Simpson's Paradox, Probability: Dependence and Independence, Conditional Probability, Bayes's Theorem, Random Variables, Continuous Distributions, The Normal Distribution, The Central Limit Theorem. | 8 Hours | | | |
|---|------------|--|--|--|
| MODULE - II | | | | |
| Hypothesis and Inference: Statistical Hypothesis Testing, Example: Flipping a Coin, p-Values, Confidence Intervals, p-Hacking, Example: Running an A/B Test, Bayesian Inference, Getting Data, stdin and stdout, Reading Files, Scraping the Web, Using APIs, Example: Using the Twitter APIs, Working with Data: Exploring the Data, Using Named Tuples, Data classes, Cleaning and Munging, Manipulating Data, Rescaling, tqdm library, Dimensionality Reduction. | 8 Hours | | | |
| MODULE - III | | | | |
| Introduction to Big Data Analytics: Introduction to Big Data Analytics: Big Data, Scalability and Parallel Processing, Designing Data | 8 Hours | | | |
| Architecture, Data Sources, Quality, Pre-Processing and Storing, Data Storage and Analysis, Big Data | | | | |

Analytics Applications and Case Studies.

Machine Learning Algorithms for Big Data Analytics: introduction, Estimating the relationships, Outliers, Variances, Probability Distributions, and Correlation, Clustering Analysis: Overview of Clustering, K-Means, Hierarchical Clustering

MODULE - IV

GINEERING & MANAGEMENT

8 Hours

An Autonomous Institution MANGALURU

Introduction to Hadoop (T1): Introduction, Hadoop and its Ecosystem, Hadoop Distributed File System, MapReduce Framework and Programming Model, Hadoop Yarn, Hadoop Ecosystem Tools.

Hadoop Distributed File System Basics (T2): HDFS Design Features, Components, HDFS User Commands.

MapReduce, Hive and Pig: Introduction, MapReduce Map Tasks, Reduce Tasks and MapReduce Execution, Composing MapReduce for Calculations and Algorithms.

| MODULE - V | | | | | | | | |
|--|-------|--|--|--|--|--|--|--|
| Spark: Data Model: Resilient Distributed Datasets and Data Frames, Other data structures, | ø | | | | | | | |
| Programming Model: Data Ingestion, Basic Actions—Count, Take, and Collect, Other Operations— | | | | | | | | |
| flatMap and Reduce, Architecture, Spark SQL | Hours | | | | | | | |

COURSE OUTCOMES

| Upon completion of this course, the students will be able to: | | | | | | | |
|---|---|-----|--|--|--|--|--|
| CO No. | Course Outcome Description | | | | | | |
| CO1 | Explain the Data science Concepts and demonstrate the data representations using visualization tools. | CL3 | | | | | |
| CO2 | Make use of Statistical hypothesis tests to choose the properties of data, curate and manipulate Data. | CL3 | | | | | |
| CO3 | Discuss the fundamentals of Big Data analytics and apply Machine Learning algorithms for analyzing real world big data. | CL3 | | | | | |
| CO4 | Illustrate Hadoop Distributed File system using MapReduce programming model to process big data. | CL3 | | | | | |
| CO5 | Discuss the SPARK data model and demonstrate SPARK Programming Model. | CL3 | | | | | |

CO-PO-PSO MAPPING

NOTE:

- Assessment will be both CIA and SEE.
- The practical sessions of the IPCC shall be for CIE only.
- The Theory component of the IPCC shall be for both CIA and SEE respectively.
- The questions from the practical sessions shall be included in Theory SEE.

Note: For Examinations (both CIE and SEE), the question papers shall contain the questions mapped to the appropriate Bloom's Level. Any COs mapped with higher cognitive Bloom's Level may also be assessed through the assignments.

SEE QUESTION PAPER PATTERN:

- 1. The question paper will have TEN full questions from FIVE Modules
- 2. There will be 2 full questions from each module. Every question will carry a maximum of 20 marks.
- 3. Each full question may have a maximum of four sub-questions covering all the topics under a module.
- 4. The students will have to answer FIVE full questions, selecting one full question from each module.

| Total Hours of Pedagogy | 20P | Exam Hours | 03 | | | |
| CREDITS – 1 | | | | | | |

COURSE PREREQUISITES:

- Introductory knowledge on mathematic, linear algebra
- Proficiency on programming language like Python and R

COURSE OBJECTIVES:

- Support the computers make intelligent decisions with limited human assistance.
- Assist software agents learn how to reach their goals.

TEACHING - LEARNING STRATEGY:

Following are some sample strategies that can be incorporate for the Course Delivery

- Chalk and Talk Method/Blended Mode Method
- Power Point Presentation
- Expert Talk/Webinar/Seminar
- Video Streaming/Self-Study/Simulations
- Peer-to-Peer Activities
- Activity/Problem Based Learning
- Case Studies
- MOOC/NPTEL Courses
- Any other innovative initiatives with respect to the Course contents

LIST OF EXPERIMENTS

| Sl. No. | Description |
|------------|--|
| Pre-rec | quisite: |
| | Part-A |
| 1 | Write a program to demonstrate the working of different activation functions like Sigmoid, Tanh, RELU and softmax to train neural network. |
| 2 | a. Design a single unit perceptron for classification of a linearly separable binary dataset without using pre-defined models. Use the Perceptron () from sklearn.b. Identify the problem with single unit Perceptron. Classify using Or, And and Xor data and analyze the result |
| 3 | Build a Deep Feed Forward ANN by implementing the Backpropagation algorithm and test the same using appropriate data sets. Use the number of hidden layers >=4. |
| | Design and implement a CNN model (with 4+ layers of convolutions) to classify multi category image datasets. Use the concept of regularization and dropout while designing the CNN model. Use the Fashion MNIST datasets. Record the Training accuracy and Test accuracy corresponding to the following architectures: |
| 4 | a. Base Model |
| | b. Model with L1 Regularization |
| | c. Model with L2 Regularization |
| | d. Model with Dropout |
| 5 | Design and implement an Image classification model to classify a dataset of images using Deep Feed Forward Neural Network. Record the accuracy corresponding to the number of epochs. Use the MNIST datasets. |
| 6 | Implement Bidirectional Long Short-Term Memory(LSTM) for sentiment analysis on movie reviews. |

ENGINEERING & MANAGEMENT

An Autonomous Institution MANGALURU

ASSESSMENT STRATEGY:

I. In Laboratory Courses where (B) and (C) are not the components of the assessment pattern, then (A) will have 100% weightage (50 Marks).

Assessment Mode: Weekly Assessment of Laboratory Work (50 Marks) - the marks will be awarded based on the Continuous Internal Assessment (Weekly Assessment, each of 25 marks) of the students in each laboratory session. The average of all the marks obtained across the sessions will be the Final CIA marks.

II. In Laboratory Courses where (C) is not a component of the assessment pattern, then (A) will have 50% weightage (25 Marks), and (B) will have 50% weightage (25 Marks).

Assessment Mode: The marks will be awarded based on the Continuous Internal Assessment (Weekly Assessment) (A) and One Laboratory Test (B).

- In Weekly Assessment, the student will be evaluated in each laboratory session for 25 marks. The average marks obtained across all the experiments will be the marks obtained for (A).
- A Laboratory Test, similar to the SEE exam is conducted towards the end of the Semester/Course, whichever is earlier. The obtained marks are scaled down to 25 Marks (B)

The Sum of marks obtained across (A) and (B) will be the Final CIA marks.

- III. In Laboratory Courses where (C) is a component of the assessment pattern, then assessment will be done by considering the weightages given above, i.e. (A) 25 Marks (Weekly Assessment), (B) 15 Marks (Laboratory Examination), (C) 10 marks (Open Ended Experiments/Mini Projects)
 - The respective course instructor will design the assessment criteria for the said assessment components.
 - The assessment components will be made known to the students by the respective Course Coordinators prior to the commencement of the Laboratory Work.
- In all the cases, the assessments will be done based on the criteria designed by the Course Coordinator.

SEE QUESTION PAPER PATTERN:

- 1. All laboratory experiments should be included for practical examination, from which students are allowed to pick one experiment from the lot.
- 2. SEE shall be conducted for 100 Marks and the marks will be scaled down to 50.
- 3. General Marks Distribution: Procedure + Conduction + Viva = 20% + 50% + 30%.
- 4. Change of experiment is allowed only once and 20% of the marks allotted to the Procedure will be made ZERO (if a question carries two experiments, both should be changed). The evaluation will be done for 80% of the total maximum marks.

marks obtained across all the experiments will be the marks obtained for (A).

• A Laboratory Test, similar to the SEE exam is conducted towards the end of the Semester/Course, whichever is earlier. The obtained marks are scaled down to 25 Marks (B)

An Autonomous Institution MANGALURU

NEERING & MANAGEMENT

- The Sum of marks obtained across (A) and (B) will be the Final CIA marks.
- III. In Laboratory Courses where (C) is a component of the assessment pattern, then assessment will be done by considering the weightages given above, i.e. (A) 25 Marks (Weekly Assessment), (B) 15 Marks (Laboratory Examination), (C) 10 marks (Open Ended Experiments/Mini Projects)
 - The respective course instructor will design the assessment criteria for the said assessment components.
 - The assessment components will be made known to the students by the respective Course Coordinators prior to the commencement of the Laboratory Work.

In all the cases, the assessments will be done based on the criteria designed by the Course Coordinator.

SEE QUESTION PAPER PATTERN:

- 1. All laboratory experiments should be included for practical examination, from which students are allowed to pick one experiment from the lot.
- 2. SEE shall be conducted for 100 Marks and the marks will be scaled down to 50.
- 3. General Marks Distribution: Procedure + Conduction + Viva = 20% + 50% + 30%.
- 4. Change of experiment is allowed only once and 20% of the marks allotted to the Procedure will be made ZERO (if a question carries two experiments, both should be changed). The evaluation will be done for 80% of the total maximum marks.
