Sahyadri to get hi-tech mfg facility

TIMES NEWS NETWORK

Mangaluru: In an endeavour to make students industry-ready by upgrading their skills, Sahyadri College of Engineering and Management is all set to welcome the Caliper Engineering and Lab Pvt Ltd on its campus on Saturday.

Caliper has set-up its branch at a cost of Rs 3 crore specifically for mechanical engineering sector.

Already home to RDL technologies in the area of embedded systems, DTT LabZ, specialised in innovation and Aptra Tech Pvt Ltd, skilling in enterprise resource planning (ERP), Caliper's entry means Sahyadri will become the first campus in the country to have an integrated high-tech manufacturing facility, said U M Bhushi, principal the college.

VTU's deal with private web portal draws flak

According to the MoU, student details will be shared with the company

TANU KULKARNI BENGALURU

A memorandum of understanding (MoU) between Visvesvaraya Technological University (VTU) and a private job assessment web portal, signed on Thursday, has drawn the ire of students. For, under the agreement, the university will share with the firm the personal details of students.

The MoU has been signed on the understanding that the portal will conduct free assessment for final-year students of 202 affiliated colleges. According to a release from VTU, it has entered into an MoU with HireMee in order to connect students with companies and bridge the gap between the Tier II and Tier III cities.

Sanjiv Kataria, advisor, HireMee, said VTU's training and placement officers have been requested to share details of their graduating students with the company. Based on this, the company will connect with affiliated colleges to fix the dates for assessment tests. To do this, the company will require the names of students, the programmes they are enrolled for, current scores and their class 10 and 12 scores, date of birth, email ID, phone number and gender details. He said all the details will be used to generate an email ID so that students can access the link to download the portal's mobile app. Hall tickets for the assessment test will be dispatched thus.

H.N. Jagannath Reddy, Registrar of VTU, said the centralised placement cell would give the data to the firm. He, however, said it was an optional test that student can choose to sit for.

'Confidential' data

Students and staff have taken exception to this and have urged the university not to part with "confidential information". "The university is taking a big risk by giving away the numbers of thousands of students. The company can use the contact details for their vested interests," a faculty member of an engineering college in Bengaluru said.

Meanwhile, a student said he was not happy with his grades being sent to a private firm. "I do not want anyone to figure out what my grades are. We have given the university all our details with the confidence that they will not share it with a third party," he said.
