Round E of Kick Start 2021 was conducted on 22nd August 2021 for the Engineering students of 2022 outgoing Batch. Kick start offers programmers of all skill levels the opportunity to boost their skills through a series of intriguing algorithmic and mathematical problems designed by Google engineers. Kick Start is recommended for students who have taken at least a basic algorithm and data structures class. Google has also posted the past problems on their website, so participants can practice whenever they'd like.

COHESITY

Cohesity Conducted their first round of virtual campus recruitment drive for the Computer Science and Information Science & Engineering students of 2022 outgoing Batch. Hiring is for the role of Site Reliability Engineer.

About COHESITY

Cohesity is redefining data management from the ground up to solve a critical challenge facing businesses today: mass data fragmentation. Most enterprise data — backups, archives, file shares, object stores, and data used for test/dev and analytics — sits in fragmented infrastructure silos that make it hard to protect, expensive to manage, and difficult to analyze. Cohesity consolidates silos onto one web-scale platform, spanning on-premises, cloud, and the edge, and uniquely empowers organizations to run apps on that platform — making it easier than ever to back up and extract insights from data. They are a values-led company looking for great people who love challenges, are collaborative and curious, unafraid to try, and passionate about customer success.

Opportunity at
