8 CASE STUDY [Compulsory]

When Colgate discovered that 47% of the total population in India never visited a dentist they decided to launch a nationwide oral health awareness campaign—oral health month. The programme offered free in clinic dental checkups and to boost awareness Colgate launched the “spreading a million smiles” with a mobile campaign. Oral health month provided free dental checkups in over 1300 cities and towns all over India mobile vans were also used to cover remote areas.

Colgate India, used mobile advertising due to its popularity in India so as to raise awareness and encourage people to bring their families for local checkups.

A mobile number was promoted across mass-media touch points such as TV, print to provide information on the nearest free dental checkup centers.

In order to receive more information a consumer had to just give a missed call or send a text with a pincode to the mobile number. After giving a missed call the caller received a call back from Colgate Via an IVR system that requested that the caller take a “healthy month pledge” for their entire family. Colgate also set up geotargeted campaigns on Facebook. Hypertargeted ads appeared in the Facebook newsfeed of featured phone users. With the use of technology Colgate was able to spread smiles to 4.9 million people across the country.

Questions :

- a. What is IVR? Discuss benefits of using it in marketing. (08 Marks)
- b. Suggest other mobile advertising formats that could have been used by Colgate to spread a million smiles. (08 Marks)
