b. Explain Boumolis sales revenue maximization model. (05 Marks)
- 7 a. What is meant by inelastic demand? Give an example. (05 Marks)
b. Determine the price elasticity of demand
when $Q_1 = 100$ units $P_1 = \text{Rs.}20$
 $Q_2 = 70$ units $P_2 = \text{Rs.}40$. (05 Marks)

SECTION – D
(Compulsory)

- 8 Globalization and opening up of the Indian economy has increased the disposable income among Indians, especially the youth in urban areas. Indian car buyers now view cars more as a fashion statement than as a means of getting around. Cars are driven to work and also for family outing during weekends. Indian buyers also desire bigger and smarter cars that serve as status symbols and fashion statement. Easy availability of car loans and comparison of cars brands among the educated working youth coupled with intense competition has led to the launch of many designs of cars. However, the traffic congestion and infrastructure bottlenecks necessitates the need for smaller, more fuel efficient cars. The traditional image of an Indian employee travelling by public transportation is undergoing a change.

Questions:

- i) How do you compare and contrast smaller cars vis-à-vis bigger and more luxurious cars, in the economic context of the changing demographic profile in India. (05 Marks)
- ii) Infrastructure is key to the growth of Indian economy. What should be done to remove the infrastructure bottlenecks in our country for speeding up the economic growth? (05 Marks)
- iii) Comment on the characteristic of demand of petrol/diesel with respect to cars. Also comment on the income elasticity of demand for the product 'car'. (10 Marks)
