

# Fourth Semester B.E. Degree Examination, Feb./Mar. 2022 **Concrete Technology**

Time: 3 hrs.

1

Max. Marks: 100

- Note: 1. Answer any FIVE full questions, choosing ONE full question from each module. 2. Use of IS10262-2009 is permitted. 3. Assume any missing data suitably.

# Module-1

What are Bouge's compounds? Explain the importance of Bouge's compounds. (08 Marks) a. List the different laboratory tests conducted on cement. Explain fineness modulus (fitness b. test). (12 Marks)

- List the various laboratory tests conducted for mechanical properties of coarse aggregate. 2 a. Explain the test for determining impact value. (10 Marks)
  - b. Define admixture. Briefly discuss mineral and chemical admixture. (10 Marks)

#### Module-2

Briefly explain the factors which affects the workability of concrete. 3 a. (10 Marks) b.

List out the different test employed to measure workability. Explain slump test. (10 Marks)

#### OR

4	a.	Explain segregation and bleeding.		(04 Marks)
	b.	Explain the manufacturing process of concrete.		(12 Marks)
	c.	List the different methods of curing.	5	(04 Marks)

### Module-3

Explain the factors affecting the strength of hardened concrete. 5 (10 Marks) b. What is shrinkage of concrete? Explain different types of shrinkage. (10 Marks)

### OR

Define durability. Explain sulphate attack and carbonation. 6 a. (10 Marks) With neat sketch, explain electro chemical process of corrosion of steel. b. (10 Marks)

## Module-4

Discuss the concept of mix design and variables in proportioning of concrete. 7 (10 Marks) a. Write step by step procedure for mix design as per IS-code. b. (10 Marks)

CENTRAL

LIBRAR

OR

- 8 Design a concrete mix for M30
  - a. Type of cement : OPC 53 grade
  - b. Max nominal size of aggregates 20mm down
  - c. W/C: 0.50

9

- d. Min cement content : as per IS-code
- e. Exposure condition : Moderate
- f. Workability : 100mm slump
- g. Max cement content : As per IS-code
- h. Fine aggregate: Zone 2
  A. Cement Type of cement : OPC 53 grade Specific gravity 3.15
  - B. Coarse aggregate specific gravity 2.70 water absorption : 1%
    - free surface moistures NII
  - C. Fine aggregate specific gravity 2.65

water absorption 2%

free surface moisture 2%

Note: Assume any missing datas.

(20 Marks)

(06 Marks)

# Module-5

- a. List the advantages and disadvantages of Ready mix concrete. (06 Marks)
- b. What is self compacting concrete? List the benefits of self compacting concrete. (08 Marks)
- c. Explain flow ability test (V funnel test) for S.C.C.

# OR

10a.Write short notes on light weight concrete and fibre reinforced concrete.(10 Marks)b.Discuss different types of fibre used in fibre reinforced concrete.(10 Marks)
