

# Sixth Semester B.E. Degree Examination, Jan./Feb. 2021 Python Application Programming

CBCS SCHEME

Time: 3 hrs.

USN

Max. Marks: 80

15CS664

(04 Marks)

Note: Answer any FIVE full questions, choosing ONE full question from each module.

# Module-1

1	a.	Explain the computer hardware architecture with a neat sketch. (06 Marks	5)
	b.	Write a note on general types of errors. (06 Marks	5)
	c.	Write a program that uses input to prompt a user for their name and then welcomes them.	
		(04 Marks	5)

### OR 🔨

- Write a program which prompts the user for a Celsius temperature, convert the temperature 2 a. to Fahrenheit and print the converted temperature. (06 Marks)
  - Explain nested conditional statement with an example. b.
  - Write a program with a function computer grade that takes a score as its parameter and c. returns a grade as a string. (06 Marks)

#### Module-2

- Analyze the use of break and continue statement with an example. (06 Marks) a. (03 Marks)
- Explain format operators in python with suitable examples. b.
- Define a file data structure. Illustrate reading and writing operation on files with examples. (07 Marks)

4	a.	Write a program to read numbers repeatedly until the user enters 'done'. Once	e 'done' is
		entered print out total, count and average of the numbers.	(06 Marks)
	b.	Write a note on string methods.	(07 Marks)
	c.	Write a program to read through a file and print the contents of the file (line by	line) all in
		upper case.	(03 Marks)

#### Module-3

Explain list operations and list methods with examples. 5 (05 Marks) a. Write a program to count how many times each letter appears in a word. (07 Marks) b. Explain tuple assignment with examples. (04 Marks) c.

## OR

- Write a program to open a file and read it line by line. For each line, split the line into list of 6 a. words using split function. For each word check to see if the word is already in a list. If the word is not in the list, add it to the list. (06 Marks)
  - Explain advanced text parsing using dictionary. (07 Marks) b.
  - Why search and find all functions of regular expressions used? Explain with suitable c. examples. (03 Marks)

3

#### **Module-4**

7 Define class. Explain classes and objects of python in detail with suitable examples. a.

> (10 Marks) (06 Marks)

What is a pure function? Explain with an example b.

### OR

- Write a program with a function print time that takes a time object and prints it in the form 8 a. hour:minute:second. Write another function is after that takes two time objects  $t_1$  and  $t_2$  and resume True if  $t_1$  follows  $t_2$  chronologically and False otherwise. (08 Marks) (08 Marks)
  - b. Write a note on operator overloading with an example.

# Module-5

- How to retrieve web pages using urllib? Explain how to compute frequency of each word in 9 a. the file retrieved. (08 Marks) (08 Marks)
  - b. What is an API? Explain with a neat sketch.

10 Write a program to read binary files. a. Explain keys in a database model. b.

(08 Marks) (08 Marks)
